MAINTENANCE

To maintain the appearance and longevity of your ONBRILL Record Player Stand, follow these simple care instructions:

- **Cleaning:** Wipe the surface clean effortlessly with a dry cloth. For stubborn marks, a slightly damp cloth can be used, followed immediately by a dry cloth. Avoid harsh chemicals or abrasive cleaners.
- **Dusting:** Regularly dust the stand to prevent buildup.
- **Spills:** Clean up spills immediately to prevent staining or damage to the engineered wood finish.
- **Heat and Moisture:** Avoid placing hot items directly on the surface. Use coasters or protective pads. Keep the

stand away from excessive moisture or direct heat sources.

TROUBLESHOOTING

If you encounter any issues with your record player stand, consider the following common solutions:

- **Wobbly Stand:** Ensure all screws and fasteners are tightened. If the floor is uneven, adjust the leveling feet (if present) or place shims under the legs.
- **Sliding Doors Sticking:** Over time, the sliding mechanism might become less smooth. Clean the tracks to remove any dust or debris. A small amount of silicone-based lubricant (not WD-40) can be applied to the tracks if needed, but test in an inconspicuous area first.
- **Charging Station Not Working:** Check if the power cord is securely plugged into a wall outlet. Ensure the wall outlet is functional. Test with different devices. If issues persist, contact customer support.
- **Missing Parts:** If you discover missing parts during assembly, refer to the package contents section and contact ONBRILL customer support with your purchase details.
