## KAPVOE K718

# KAPVOE Magnetic Ski Goggles K718 Instruction Manual

Model: K718

## INTRODUCTION

Thank you for choosing KAPVOE Magnetic Ski Goggles K718. These goggles are designed to provide superior vision and protection for snow sports enthusiasts. Featuring advanced photochromic lenses, anti-fog technology, and an OTG (Over-The-Glasses) design, they ensure a clear and comfortable experience in various conditions.

## KEY FEATURES

- Compound Eye Anti-Fog Technology:** Microscopic protuberances on the lens surface create an air layer to prevent water vapor adhesion. An inner anti-fog layer absorbs moisture, complemented by honeycomb vent holes for air circulation, reducing condensation.
- Photochromic Lens:** Lenses automatically adjust tint based on UV intensity (S1 to S4 VLT), providing clear vision from low light to bright sun without needing lens changes.

- **High-Definition Vision (X-VYNS Coating):** Enhances color, contrast, and brightness for clear, accurate vision. Oleophobic coating prevents smudges. All lenses offer 99.99% UV400 protection.
- **OTG (Over-The-Glasses) Design:** Wide panoramic lenses accommodate most prescription glasses.
- **Helmet Compatibility:** Adjustable straps and inner anti-slip silicone ensure a secure fit with most helmets.
- **Magnetic Lens System:** Allows for quick and easy lens changes.

## SETUP INSTRUCTIONS

---

### 1. Attaching the Lens

The KAPVOE K718 goggles feature a magnetic lens system for easy attachment and removal. Align the lens with the goggle frame, and the magnets will securely snap it into place. Ensure all magnetic points are engaged for a proper seal.

### 2. Adjusting the Strap

Adjust the elastic strap to achieve a snug yet comfortable fit around your head or helmet. The strap is designed to be extra-long for compatibility with various helmet sizes. The inner anti-slip silicone helps keep the goggles firmly in position during activity.

### 3. OTG (Over-The-Glasses) Compatibility

If you wear prescription glasses, the OTG design allows you to wear them comfortably underneath the goggles. Ensure your glasses fit within the goggle frame without causing pressure points.

## OPERATING INSTRUCTIONS

### Photochromic Lens Functionality

The photochromic lens automatically adjusts its tint based on the intensity of ultraviolet (UV) light. This means the lens will darken in bright sunlight (S4) and lighten in overcast conditions or at night (S1), providing optimal visibility without manual lens changes. This adaptation occurs seamlessly as light conditions change.

## Anti-Fog System

The goggles are equipped with a multi-layered anti-fog system. The compound eye technology and internal moisture-absorbing layer work together with the frame's ventilation to minimize fogging. For best performance, avoid wiping the inner lens surface, as this can damage the anti-fog coating.

## MAINTENANCE

---

### Cleaning Instructions

- Use a soft cloth (preferably the included goggle bag) to gently wipe the lenses.
- Avoid using harsh cleaners, abrasive materials, or paper products, as these can damage the lens coatings.
- For stubborn dirt, lightly dampen the cloth with water. Do not rub vigorously.

### Storage

- Always store your goggles in a cool, dry place.
- Avoid direct sunlight or high temperatures, which can affect lens performance and frame integrity.
- Do not store the goggles with the lenses facing down or against hard surfaces to prevent scratches.
- Utilize the provided EVA box and soft bag for protection during transport and storage.

## TROUBLESHOOTING

### Fogging Issues

- **Ensure Proper Ventilation:** Check that the goggle's honeycomb vents are not obstructed by your helmet or clothing.
- **Avoid Wiping Inner Lens:** The anti-fog coating is delicate. Wiping the inner lens can damage it and reduce its effectiveness. If moisture builds up, gently shake the goggles or allow them to air dry.
- **Minimize Moisture Exposure:** Try to keep the goggles on your face as much as possible to maintain a consistent temperature. Removing them frequently can introduce warm, moist air that leads to fogging.

## Poor Fit or Discomfort

- **Adjust Strap:** Re-adjust the elastic strap to ensure it is neither too tight nor too loose. It should provide a secure fit without causing excessive pressure.
- **Helmet Compatibility:** Verify that your helmet and goggles are compatible. The goggles should sit flush against your face and helmet without creating a "goggle gap" or pushing the helmet upwards.

## SPECIFICATIONS

Feature	Detail
Model	K718
Lens Type	Photochromic (S1-S4 VLT)
UV Protection	UV400 (99.99% UVA/UVB block)
Anti-Fog Technology	Compound Eye, Inner Anti-Fog Layer, Honeycomb Vents
Frame Material	Secure TPU Frame
Face Foam	3 Layers of High Resilience Foam
Lens Attachment	Magnetic
Compatibility	OTG (Over-The-Glasses), Helmet Compatible
Strap	Adjustable, Extra-Long Elastic with Anti-Slip Silicone

## SKI GOGGLE LENS SELECTION GUIDE

S1-S4 is an international transmittance rating for ski-goggle lenses. It guides lens choice for different light, reducing glare and protecting eyes. Higher category = lower transmittance, stronger light blocking.

## WARRANTY AND SUPPORT

---

### Warranty Information

KAPVOE provides a 1-year after-sales service for this product. This warranty covers manufacturing defects and issues arising from normal use.

### Customer Support

For any questions, concerns, or warranty claims, please contact KAPVOE customer support. You can typically find contact information on the product packaging or through the seller's page on Amazon. When contacting support, please have your product model (K718) and purchase details available.

For additional information, you may visit the official KAPVOE Store:[KAPVOE Store on Amazon](#).
