## 8. Troubleshooting

- No Sound/Microphone Not Working:**

Ensure the headset is powered on and fully charged. Check your device's audio settings to confirm the Earbay headset (BT-68 or BT68-DONGLE) is selected as the input and output device. For PC, try updating Bluetooth drivers or using the USB dongle.
- Cannot Pair with Device:**

Make sure the headset is in pairing mode (refer to your device's Bluetooth instructions). Ensure no other devices are actively connected to the headset. Try restarting both the headset and your device.
- Poor Audio Quality/Intermittent Connection:**

Check the distance between the headset and your device; ensure it's within the 15-meter range. Avoid obstacles that may interfere with the Bluetooth signal. Ensure the headset is fully charged.
- Mute Function Not Working:**

The mute function on the microphone is active only during an ongoing call. Ensure you are in an active call when

attempting to use the mute button.
