Generic Heated Throw Blanket User Manual

Model: B0G584PR3J

INTRODUCTION

Thank you for purchasing the Generic Heated Throw Blanket. This manual provides important information regarding the safe operation, setup, maintenance, and troubleshooting of your new heated blanket. Please read this manual thoroughly before use and retain it for future reference.

This heated throw blanket is designed to provide warmth and comfort. It features multiple heat settings, a timing function, and an automatic power-off for safety. The blanket is made from soft, plush material for enhanced comfort.

Skin-friendly plush material is more comfortable

IMPORTANT SAFETY INSTRUCTIONS

Failure to follow these safety instructions may result in fire, electric shock, or injury. Please read all instructions carefully before using this product.

- This product is not suitable for individuals who are not heat sensitive.
- Children under 8 years old and individuals with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge, should only use this product under the guidance and accompaniment of their legal

guardians.

- Avoid contact with sharp objects on the blanket body to prevent piercing the electric blanket and causing accidents.
- Do not use this product when it is wet or not completely dry.
- The power supply used must meet the requirements specified for this product (Voltage: 110V-240V).
- This product prohibits bleaching, drying, ironing, and dry cleaning. Refer to the Maintenance section for cleaning instructions.
- Do not use any other heat-generating products on or under the blanket (such as hot-water bottles or heating pads).
- This product is not suitable for medical purposes. The electrical field it emits can impair the function of cardiac pacemakers. Consult a doctor and pacemaker manufacturer before using this product if you have a pacemaker.
- When using, be careful not to fold, crumple, or press the electric blanket excessively. Ensure it lies flat.
- Always unplug the blanket from the power outlet when not in use or before cleaning.
- Do not insert pins or other metallic objects into the blanket.
- Do not use if the blanket or power cord is damaged. Contact customer support for assistance.

PACKAGE CONTENTS

Please check the package contents upon opening to ensure all items are present and undamaged. If any items are missing or damaged, please contact customer support.

- 1 x Heated Throw Blanket (Gray, 200x180cm)
- 1 x Detachable Controller with Power Cord
- 1 x User Manual (this document)

SETUP INSTRUCTIONS

1. **Unpack the Blanket:** Carefully remove the heated blanket and controller from its packaging. Retain packaging for storage if desired.
2. **Position the Blanket:** Lay the heated blanket flat on your bed or desired surface. Ensure there are no folds, creases, or bunched areas. The blanket is designed to be placed under a sheet or duvet.

Image: The heated blanket positioned flat on a bed, ready for use.

3. **Connect the Controller:** Locate the connector on the blanket and the corresponding plug on the controller. Firmly push the controller plug into the blanket connector until it clicks securely into place.
4. **Plug into Power Outlet:** Insert the power cord plug into a standard electrical outlet (110V-240V). Ensure the outlet is easily accessible.

OPERATING INSTRUCTIONS

Your heated blanket features multiple heat settings, a timer, and intelligent temperature control.

Intelligent partition temperature control design, does not affect each other, suitable for different physical groups

Image: The controller displaying independent temperature settings for left and right zones, along with timer options (2, 4, 8 hours).

Multi-level timing, overheating and power failure, left and right partition

Image: Illustrates the blanket's multi-level timing, overheating protection, and left/right partition temperature control.

1. **Power On/Off:** Press the power button on the controller to turn the blanket on. Press it again to turn off.
2. **Adjust Heat Settings:** Use the temperature control buttons (e.g., " " for left temperature, " " for right temperature, if applicable) to select your desired heat level. The blanket may feature multiple heat settings.
3. **Set Timer:** Press the timer button (e.g., " ") to cycle through available timer settings (e.g., 2 hours, 4 hours, 8 hours). The blanket will automatically shut off after the selected time.
4. **Dual Zone Control:** If your blanket has dual controls, each side can be adjusted independently for personalized comfort.
5. **Pre-heating:** For best results, turn on the blanket 15-30 minutes before use to allow it to pre-heat to your desired temperature.

Safety Features:

- **Overheating Protection:** The blanket is equipped with an advanced safety system that automatically shuts off power if it detects overheating.

- **Automatic Power Off:** In addition to the timer, the blanket may have a default automatic shut-off feature for added safety.

The heating wire is distributed throughout the bed, there is no dead angle in the heating area, and the heating wire is evenly distributed

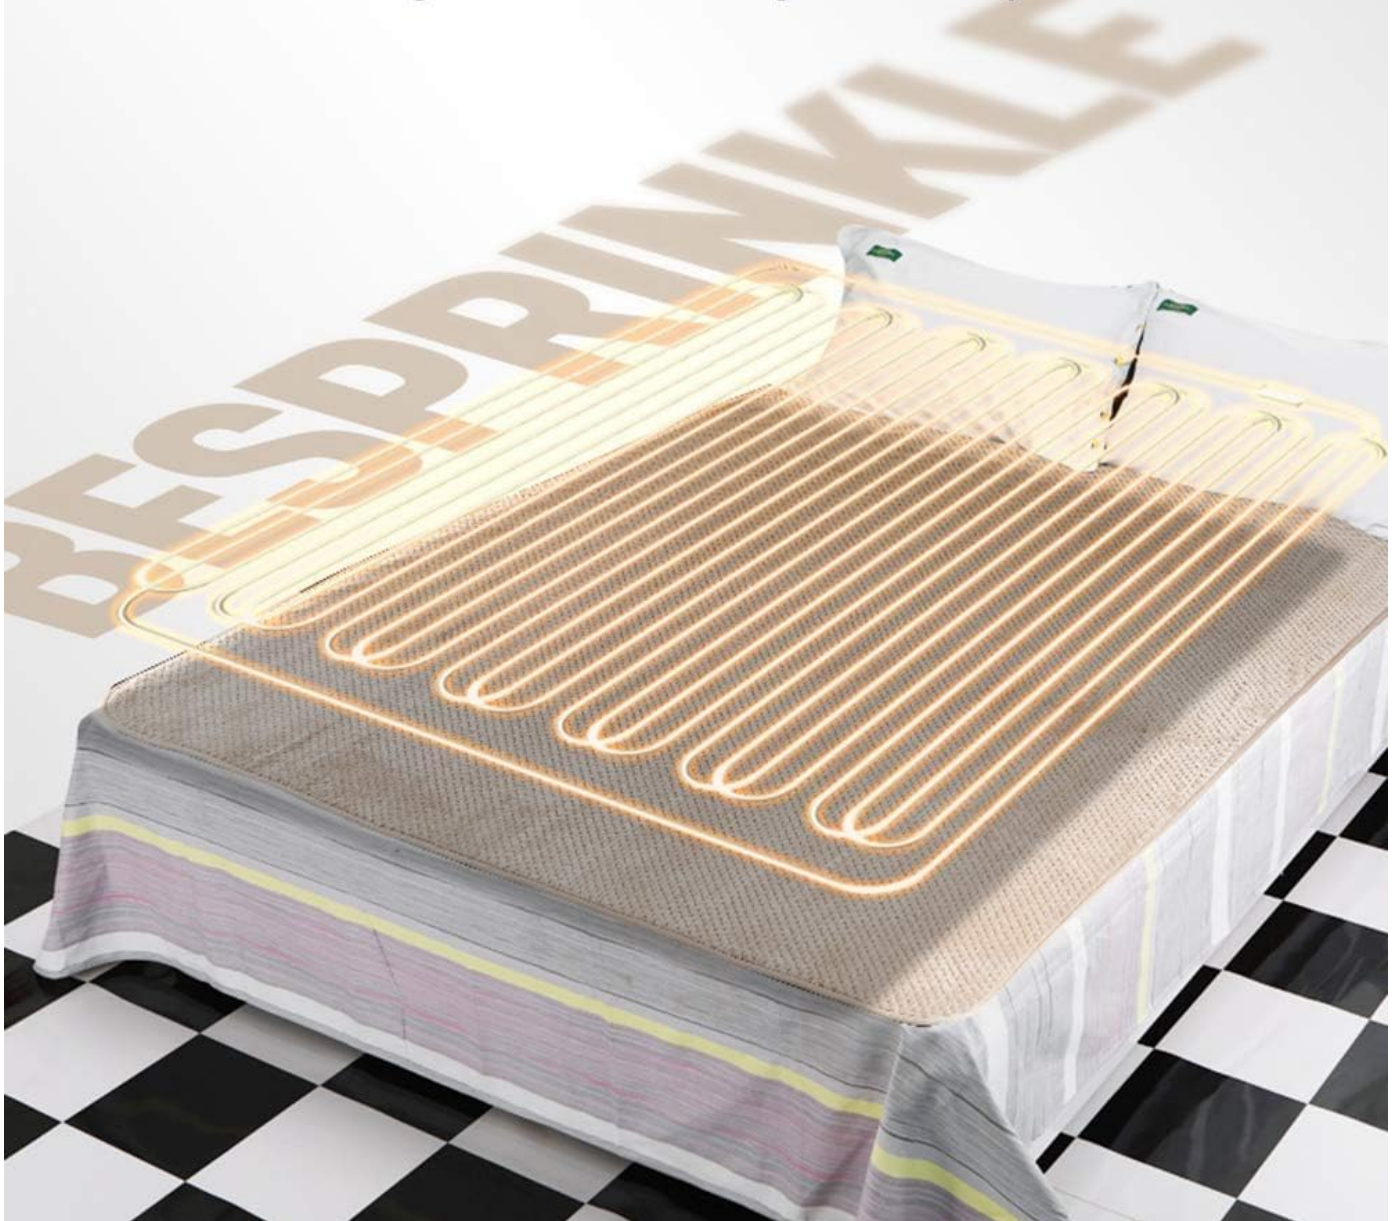

Image: Diagram illustrating the uniform distribution of heating wires throughout the blanket for consistent warmth.

CARE AND MAINTENANCE

Proper care will extend the life of your heated blanket. Always disconnect the controller from the blanket and unplug it from the power outlet before cleaning.

Cleaning Instructions:

- **Disconnect Controller:** Ensure the controller is completely detached from the blanket before washing.
- **Machine Wash (if applicable):** If the blanket is machine washable (check product label), use a gentle cycle with cold water and mild detergent. Do not bleach.
- **Hand Wash:** If machine washing is not recommended, hand wash gently in cold water with mild detergent.
- **Rinse Thoroughly:** Ensure all detergent is rinsed out.

- **Drying:** Line dry or tumble dry on a low heat setting. Ensure the blanket is completely dry before reconnecting the controller or storing. Do not iron or dry clean.
- **Do NOT Bleach, Iron, or Dry Clean.**

Storage:

When not in use, store the blanket in a cool, dry place. Avoid placing heavy objects on top of the blanket, as this may damage the internal heating elements.

TROUBLESHOOTING

If you experience issues with your heated blanket, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Blanket is not heating.	Not plugged in. Controller not securely connected. Power outlet issue. Overheating protection activated.	Ensure power cord is firmly plugged into an active outlet. Check that the controller is securely connected to the blanket. Test the outlet with another appliance. Unplug the blanket for 30 minutes, then plug back in. If the issue persists, contact support.
Controller display is off or not responding.	No power. Controller malfunction.	Check power connection as above. Try unplugging and re-plugging the controller. If still unresponsive, contact support.
Blanket feels too hot or not hot enough.	Incorrect heat setting. Blanket folded or bunched.	Adjust the heat setting on the controller. Ensure the blanket is laid flat without folds or creases.

If the problem persists after trying these solutions, please contact customer support.
