TROUBLESHOOTING

If you encounter any issues with your vanity, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Drawers do not slide smoothly	Improperly installed drawer slides or debris in tracks.	Check that drawer slides are correctly aligned and securely fastened. Clean tracks of any dust or obstructions.
Cabinet door does not close properly or is misaligned	Hinges are loose or require adjustment.	Tighten hinge screws. Adjust the hinge screws to align the door. Refer to the assembly manual for hinge adjustment details.
Vanity feels unstable	Loose connections or uneven floor.	Ensure all assembly hardware is fully tightened. If the floor is uneven, use shims under the legs to stabilize the vanity.
Water leakage around sink	Improper faucet or drain installation.	Ensure all plumbing connections (faucet, drain) are properly sealed and tightened. Consult a professional plumber if necessary.
