

## Casio MTP-B195L-1AVDF

# Casio Enticer MTP-B195L-1AVDF Analog Watch User Manual

Model: MTP-B195L-1AVDF

## 1. INTRODUCTION

---

Thank you for choosing the Casio Enticer MTP-B195L-1AVDF Analog Watch. This manual provides essential information regarding the setup, operation, maintenance, and troubleshooting of your new timepiece. This watch features a durable stainless-steel case, a comfortable leather band, 50-meter water resistance, and a convenient date display.

*Figure 1: Front view of the Casio Enticer MTP-B195L-1AVDF Analog Watch.*

## **2. SETUP**

---

### **2.1. Setting the Time**

1. Pull the crown (the knob on the side of the watch) out to the second click position.
2. Rotate the crown to move the hour and minute hands to the desired time.
3. Push the crown back in to the normal position to start timekeeping.

Figure 2: Side view illustrating the crown for time adjustment.

## 2.2. Setting the Date

1. Pull the crown out to the first click position.
2. Rotate the crown clockwise to set the date.
3. Once the correct date is displayed, push the crown back in to the normal position.

*Note:* Avoid setting the date between 9:00 PM and 1:00 AM, as this may interfere with the automatic date change mechanism. If you need to set the date during this period, first set the time to outside this range, adjust the date, then reset the time.

## 3. OPERATING INSTRUCTIONS

---

### 3.1. Basic Timekeeping

Your Casio Enticer watch is designed for accurate timekeeping. Once the time and date are set, the watch will operate continuously. The watch features an analog display with hour, minute, and second hands, along with a date window.

*Figure 3: The watch displayed on a wrist, showing its wearability.*

### 3.2. Water Resistance

This watch is rated for 50-meter water resistance. This means it is suitable for everyday use and can withstand splashes, rain, and brief immersion in water. It is **not** suitable for swimming, diving, or showering with hot water. Always ensure the crown is fully pushed in before any contact with water.

- **Do not** operate the crown while the watch is wet or submerged.
- Avoid exposing the watch to strong water currents or high-pressure water.
- If the watch is exposed to saltwater, rinse it thoroughly with fresh water and wipe it dry.

## 4. MAINTENANCE

---

### 4.1. Cleaning Your Watch

Wipe the watch case and band with a soft, dry cloth to remove dirt and moisture. For the leather band, avoid excessive moisture and direct sunlight to prevent damage and discoloration.

### 4.2. Battery Replacement

The watch is powered by a quartz movement and requires a battery. When the watch stops or the second

hand moves erratically, it indicates a low battery. Battery replacement should be performed by a qualified watch technician to ensure proper sealing and water resistance.

### 4.3. Storage

When not in use, store your watch in a dry place, away from direct sunlight, extreme temperatures, and strong magnetic fields.

## 5. TROUBLESHOOTING

---

- **Watch not running:** Check if the crown is fully pushed in. If it is, the battery may need replacement. Contact a service center.
- **Date not changing correctly:** Ensure the date was not set between 9:00 PM and 1:00 AM. If the issue persists, consult the "Setting the Date" section or contact support.
- **Condensation inside the watch:** This indicates a loss of water resistance. Immediately take the watch to a qualified service center to prevent further damage.

## 6. SPECIFICATIONS

---

<b>Model Number</b>	MTP-B195L-1AVDF (A2527)
<b>Movement Type</b>	Quartz
<b>Display Type</b>	Analog
