Garvee QKKQ

Garvee 10L Evaporative Air Cooler User Manual

Model: QKKQ

1. Important Safety Instructions

Please read all instructions carefully before using this appliance and retain them for future reference. Failure to follow these instructions may result in electric shock, fire, or serious personal injury.

- Always operate the unit on a firm, level surface.
- Do not immerse the appliance, cord, or plug in water or other liquids.
- Unplug from the outlet when not in use, before assembling or disassembling parts, and before cleaning.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been dropped or damaged in any manner.
- Keep the appliance out of reach of children and pets.
- Do not block air inlets or outlets. Ensure at least 20cm (8 inches) clearance from walls or other objects.
- Do not use the appliance near flammable materials or in explosive atmospheres.
- Only use clean water in the water tank. Do not add any chemicals or additives.
- Ensure the water tank is properly seated and sealed to prevent leaks.
- Do not move the unit when the water tank is full.

2. Product Overview

Familiarize yourself with the components of your Garvee Evaporative Air Cooler.

Image: Front view of the Garvee Evaporative Air Cooler highlighting its main components such as the control panel, air outlet, water level indicator, and casters.

Main Components:

- **Control Panel:** Touch-sensitive buttons for all functions.
- **LED Display:** Shows current settings and status.
- **Air Outlet:** Where cooled air is discharged.
- **Water Tank:** 10L (2.6 Gallon) capacity for water and ice packs.
- **Water Level Indicator:** Shows the current water level in the tank.
- **Casters:** For easy mobility.
- **Remote Control:** For convenient operation from a distance.
- **Ice Packs:** Two reusable ice packs included to enhance cooling.
- **Carry Handle:** Integrated at the top for easy transport.

3. Setup and Preparation

3.1 Unpacking

1. Carefully remove the air cooler from its packaging.
2. Remove all packing materials, including any protective films or tapes.
3. Check for any damage during transit. If damaged, do not operate and contact customer support.

3.2 Filling the Water Tank and Adding Ice Packs

For optimal cooling performance, use cold water and the provided ice packs.

Image: A five-step visual guide demonstrating how to prepare and insert ice packs, then fill the water tank of the air cooler.

1. **Prepare Ice Packs:** If the ice packs are not pre-filled, add water to them as instructed on the pack, then place them in a freezer for at least 6 hours until completely frozen.
2. **Access Water Tank:** Open the water tank cover located at the top of the unit.
3. **Insert Ice Packs:** Place the frozen ice packs into the designated compartment within the water tank.
4. **Fill Water:** Slowly pour clean, cool water into the water tank, ensuring the water level does not exceed the 'MAX' mark on the water level indicator. Do not fill below the 'MIN' mark when using the cooling function.
5. **Close Tank:** Securely close the water tank cover.

Note: The unit supports automatic water filling via a rear port. Connect a suitable water supply hose (not included) to this port for continuous operation without manual refills.

3.3 Placement

Place the air cooler on a flat, stable surface. Ensure there is adequate space around the unit for proper airflow (at least 20cm/8 inches from walls or furniture).

4. Operating Instructions

4.1 Control Panel and LED Display

Image: Close-up view of the Garvee Evaporative Air Cooler's touch control panel and LED display, showing various function icons.

The unit features a touch-sensitive control panel and an LED display. All functions can be activated by gently touching the corresponding icons.

4.2 Remote Control

Image: The remote control for the Garvee Evaporative Air Cooler, showing buttons for power, speed, mode, timer, swing, and cool functions.

The included remote control allows you to operate all functions from a distance. Ensure there are no obstructions between the remote and the unit's sensor.

4.3 Functions

Image: Diagram illustrating the three main functions of the Garvee Air Cooler: Fan-without water, Humidifier-adding water only, and Air cooler-adding water and ice box.

- **Power ON/OFF:** Press the **ON/OFF** button to turn the unit on or off.
- **Speed:** Press the **Speed** button repeatedly to cycle through fan speeds: Low, Medium, High.
- **Mode:** Press the **Mode** button to select operating modes:
  - **Normal:** Constant airflow.
  - **Natural:** Simulates natural breeze with varying fan speeds.
  - **Sleep (Night Mode):** Operates at a lower speed and noise level for quiet operation, ideal for nighttime.
- **Cool/Humidify:** Press the **Cool** button to activate the evaporative cooling/humidifying function. This function requires water in the tank. The pump will circulate water over the cooling pad. Press again to deactivate.
- **Swing:** Press the **Swing** button to activate the automatic oscillation of the vertical louvers, distributing air more widely. Press again to stop oscillation.
- **Timer:** Press the **Timer** button repeatedly to set the auto-off timer from 1 to 7.5 hours in 0.5-hour increments. The display will show the set time.
- **Child Lock:** Some models may feature a child lock function. Refer to the display for an indicator or press and hold specific buttons (e.g., Mode and Speed) for 3 seconds to activate/deactivate.

5. Maintenance

Regular cleaning and maintenance will ensure optimal performance and extend the lifespan of your air cooler.

5.1 Cleaning the Water Tank

Clean the water tank regularly, especially if the unit is used frequently or stored for extended periods.

1. Unplug the unit from the power outlet.
2. Drain any remaining water from the tank.
3. Remove the water tank (if detachable) or access the interior.
4. Wipe the inside of the tank with a soft cloth and mild detergent. Rinse thoroughly with clean water.
5. Allow the tank to air dry completely before reassembling or refilling.

5.2 Cleaning the Cooling Pad/Filter

The cooling pad (honeycomb filter) should be cleaned periodically to prevent mineral buildup and maintain efficiency.

1. Unplug the unit.
2. Carefully remove the rear filter panel and then the cooling pad.
3. Rinse the cooling pad under running water to remove dust and mineral deposits. For stubborn buildup, soak in a solution of water and white vinegar for 30 minutes, then rinse thoroughly.
4. Allow the cooling pad to air dry completely before reinstalling.

5.3 Exterior Cleaning

Wipe the exterior of the unit with a soft, damp cloth. Do not use abrasive cleaners or solvents.

5.4 Storage

If storing the unit for an extended period:

1. Ensure the water tank and cooling pad are clean and completely dry.
2. Store the unit in a cool, dry place, away from direct sunlight.
3. Cover the unit to protect it from dust.

6. Troubleshooting

Before contacting customer service, please refer to the following troubleshooting guide for common issues.

Problem	Possible Cause	Solution
Unit does not turn on	No power supply; Power button not pressed; Damaged power cord.	Check power connection; Press power button; Contact support if cord is damaged.
No cool air / Weak cooling	No water in tank; Cooling function not activated; Cooling pad dirty; Room humidity too high; Ice packs not used/frozen.	Fill water tank; Activate 'Cool' function; Clean cooling pad; Evaporative coolers are less effective in high humidity; Use frozen ice packs.
Water leakage	Water tank overfilled; Unit not on a level surface; Water tank not properly seated/sealed; Drain plug loose.	Do not exceed 'MAX' line; Place on a level surface; Ensure tank is correctly installed; Check drain plug.
Unusual noise	Unit not on level surface; Obstruction in fan; Low water level (pump noise).	Place on level surface; Check for obstructions (unplug first); Refill water tank.
Odor from unit	New unit odor (temporary); Stagnant water; Dirty cooling pad.	Run for a few hours in a well-ventilated area; Change water frequently; Clean cooling pad and water tank.

7. Specifications

Feature	Specification
Brand	Garvee
Model Number	QKKQ
Material	Polypropylene (PP)
Color	White

Feature	Specification
Reservoir Capacity	10 Liters (2.6 Gallons)
Air Flow Capacity	350 cfm
Wattage	65W
Voltage	110V
Noise Level	51 dB
Number of Speeds	3
Controls Type	Remote, Touch
Item Weight	12.7 pounds
Dimensions (D x W x H)	12.2"D x 11.02"W x 26.38"H

8. Warranty and Support

8.1 Warranty Information

This Garvee Evaporative Air Cooler comes with a**1-year limited warranty** from the date of purchase. This warranty covers manufacturing defects in materials and workmanship under normal use. It does not cover damage resulting from misuse, accident, alteration, neglect, unauthorized repair, or normal wear and tear.

8.2 Customer Support

If you have any questions, concerns, or require assistance with your Garvee Evaporative Air Cooler, please contact the retailer where you purchased the product or visit the official Garvee website for support information.
