ZEUKMXOO 55x24x84

ZEUKMXOO Heavy Duty 5-Tier Garage Shelving Unit

Model: 55x24x84

Introduction

This manual provides detailed instructions for the assembly, operation, and maintenance of your ZEUKMXOO Heavy Duty 5-Tier Garage Shelving Unit. Please read all instructions carefully before assembly and use to ensure safe and efficient operation. Keep this manual for future reference.

Product Features

- **High Capacity:** Each shelf supports up to 610 lbs, with a total unit capacity of 3050 lbs.
- **Adjustable Tiers:** Five adjustable shelves allow for customized storage configurations to accommodate various item sizes.
- **Durable Construction:** Features double-layer folded-edge uprights and reinforced wide wire braces for enhanced stability and prevention of long-term sagging.
- **Tool-Free Assembly:** Interlocking pin design allows for quick assembly, typically within 15 minutes, using only the included plastic mallet and gloves.
- **Powder Coated Finish:** Provides resistance against scratches and rust, ensuring longevity.

Package Contents

Verify that all components are present before beginning assembly:

- 5-Tier Garage Shelving Unit Components (Uprights, Beams, Wire Shelves)
- Plastic Mallet
- Gloves
- Assembly Instructions (this manual)

Safety Information

Please adhere to the following safety guidelines to prevent injury and damage:

- **Weight Capacity:** Do not exceed the maximum weight capacity of 610 lbs per shelf or 3050 lbs for the entire unit. Overloading can cause structural failure.
- **Proper Assembly:** Ensure all components are correctly assembled and securely interlocked as per the instructions. Improper assembly can lead to instability.
- **Level Surface:** Always place the shelving unit on a flat, level, and stable surface to prevent tipping.
- **Even Distribution:** Distribute weight evenly across each shelf. Avoid concentrating heavy items in one area.
- **Children and Pets:** Keep children and pets away from the unit during assembly. Do not allow them to climb on the assembled unit.
- **Wall Anchoring:** For added stability, especially in areas prone to earthquakes or with heavy loads, consider anchoring the unit to a wall (anchoring hardware not included).

Setup and Assembly Instructions

Assembly of the ZEUKMXOO Heavy Duty 5-Tier Garage Shelving Unit is designed to be straightforward and tool-free, typically completed within 15 minutes by one person. Wearing the included gloves is recommended.

1. **Prepare Components:** Unpack all components and lay them out on a clean, flat surface. Identify the uprights, horizontal beams, and wire shelves.
2. **Assemble Base Frame:** Connect the bottom horizontal beams to the uprights to form the base frame. Ensure the interlocking pins are fully engaged. Use the plastic mallet to gently tap connections into place if needed.
3. **Install First Shelf:** Place the first wire shelf onto the assembled base frame.
4. **Build Upwards:** Continue attaching horizontal beams to the uprights at your desired height for each subsequent shelf. The uprights have multiple slots for height adjustment.
5. **Place Shelves:** Once the beams for a tier are in place, carefully position the wire shelf onto them.
6. **Secure All Connections:** After all tiers are assembled, use the plastic mallet to ensure all interlocking pins are firmly seated and connections are secure.

Operating Instructions

Your ZEUKMXOO shelving unit is designed for versatile storage in various environments such as garages, warehouses, basements, and even kitchens.

- **Adjusting Shelf Height:** To adjust a shelf's height, carefully remove any items from the shelf. Disengage the horizontal beams from the uprights by gently tapping them upwards with the mallet. Re-attach the beams at the desired height and place the wire shelf back into position, ensuring all pins are securely engaged.
- **Loading Items:** Place heavier items on lower shelves for increased stability. Distribute weight evenly across each shelf to prevent stress on individual sections.
- **Visibility:** The open wire design allows for easy visibility and access to stored items.

Image: Illustration of the adjustable shelf feature, demonstrating how the shelf height can be customized to fit various storage needs, from tall items to shorter bins.

Maintenance

To ensure the longevity and optimal performance of your shelving unit, follow these simple maintenance steps:

- **Cleaning:** Wipe the unit with a dry cloth to remove dust and debris. Avoid using abrasive cleaners or harsh chemicals that could damage the powder-coated finish.
- **Regular Inspection:** Periodically check all connections to ensure they remain secure. Re-tap any loose connections with the plastic mallet.
- **Load Management:** Continuously monitor the weight on each shelf to ensure it does not exceed the stated capacity.

Troubleshooting

If you encounter any issues with your shelving unit, consider the following:

- **Unit Wobbles:** Ensure the unit is on a level surface. Check all connections to confirm they are fully engaged. If necessary, redistribute the load evenly.
- **Difficulty Assembling:** Verify that you are using the correct components for each step. Ensure the interlocking pins are aligned correctly before tapping with the mallet. Do not force components.
- **Shelf Sagging:** This unit is designed to prevent sagging with its reinforced structure. If sagging occurs, immediately remove items from the affected shelf and inspect for damage or improper assembly. Ensure weight limits are not exceeded.

Specifications

Feature	Detail
Brand	ZEUKMXOO
Model Name	Heavy Duty Garage Shelving
Model Number	55x24x84
Material	Metal

Finish Type	Powder Coated
Color	Black
Product Dimensions (D x W x H)	24"D x 55"W x 84"H
Number of Shelves	5
Weight Capacity (Total)	3050 Pounds
Weight Capacity (Per Shelf)	610 Pounds
Assembly Required	Yes
Installation Type	Freestanding
