7. Troubleshooting

If you encounter issues with your Colorcool S7 MP3 Player, refer to the following common problems and solutions:

Problem	Solution
Device does not power on.	Ensure the device is fully charged. If the battery is depleted, connect it to a power source and try again after a few minutes.
Cannot connect to Bluetooth headphones.	Ensure Bluetooth is enabled on both the MP3 player and the headphones. Place both devices in pairing mode and ensure they are within range. The MP3 player cannot pair with phones or PCs.
Computer does not recognize the device.	Try a different USB port or cable. Ensure the cable is a data transfer cable, not just a charging cable. For Mac computers, an OTG adapter may be necessary.
Music files are not playing.	Verify that the music files are in a supported format (MP3, WMA, APE, FLAC, WAV, DRM, ACELP). Check if the files are correctly stored in the internal memory or the inserted TF card.
