### Key Features:

- **1920P Full HD Video Resolution:** Captures clear and detailed footage.
- **3000mAh Battery:** Provides 8-10 hours of continuous recording at 1080P (night vision off, screen idle).
- **Auto/Manual Night Vision:** High-power infrared for clear recording in low light or darkness.
- **150° Wide Angle Lens:** Expansive field of view.
- **Loop Recording:** Overwrites oldest footage when storage is full.
- **Motion Detection:** Records when movement is detected.
- **Password Protection:** Secures recorded data.
- **Time Stamp:** Embeds date and time into recordings.

### SETUP

---

## 1. Charging the Device

Before first use, fully charge the body camera. Connect the USB cable to the camera and then to the provided charger. Plug the charger into a standard wall outlet. The charging indicator light will show the charging status. A full charge typically takes about 4 hours.

Image: The CAMMHD H4 Body Camera emphasizing its 3000mAh battery, capable of 8 hours of continuous use.

## 2. Attaching the Clip

Select either the long or short 360° rotating clip based on your preference. Attach the clip to the back of the camera by sliding it into the designated slot until it clicks securely into place. The clip allows for flexible mounting on clothing or gear.

## 3. Powering On/Off

- **Power On:** Press and hold the Power button for a few seconds until the screen illuminates.
- **Power Off:** Press and hold the Power button until the device shuts down.

# OPERATING INSTRUCTIONS

---

## 1. Video Recording

From standby mode, press the dedicated Video Record button once to start recording. The indicator light will flash, and a recording icon will appear on the screen. Press the button again to stop recording. Videos are saved automatically.

## 2. Audio Recording

From standby mode, press the dedicated Audio Record button once to start audio-only recording. An audio recording icon will appear. Press the button again to stop recording. Audio files are saved automatically.

## 3. Photo Capture

From standby mode, press the Photo button once to take a still image. The screen may briefly flash, indicating a photo has been captured.

## 4. Night Vision

The camera features automatic and manual night vision. In low-light conditions, the camera can automatically activate its infrared LEDs. You can also manually toggle night vision on or off via the menu settings or a dedicated button (refer to device interface for specific button). Ensure clear visibility in dark environments.

## Night Vision Mode(ON)

## Day Mode

Image: Illustrates the difference between Night Vision Mode (ON) and Day Mode, showing clear visibility in dark conditions with the CAMMHD H4.

### 5. Loop Recording

When enabled, loop recording allows the camera to continuously record. Once the memory card is full, the oldest files will be automatically overwritten by new recordings. This ensures continuous operation without manual deletion of old files.

### 6. Motion Detection

Activate motion detection in the camera settings. When enabled, the camera will automatically begin recording when it detects movement within its field of view and stop when motion ceases, conserving battery and storage space.

### 7. Password Protection and Time Stamp

The camera supports password protection to secure your recorded data. Access the settings menu to set up or change your password. The time stamp feature automatically embeds the date and time onto all recordings, providing crucial chronological evidence.

## MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the camera body. For the lens, use a specialized lens cleaning cloth and solution to avoid scratches.
- **Storage:** Store the camera in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** To prolong battery life, avoid fully discharging the battery frequently. Charge the camera regularly, even if not in use, to maintain battery health.
- **Firmware Updates:** Check the manufacturer's website periodically for any available firmware updates to ensure optimal performance and new features.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Camera does not power on.	Low battery; device malfunction.	Charge the camera for at least 4 hours. If still unresponsive, contact support.
Cannot record video/audio.	Memory card full; memory card error; incorrect mode.	Check available storage. Format the memory card (this will erase all data). Ensure you are in the correct recording mode.
Poor video quality.	Dirty lens; low light conditions; incorrect resolution setting.	Clean the lens. Activate night vision in low light. Check video resolution settings in the menu.
Battery drains quickly.	Continuous recording; night vision active; screen always on.	Reduce continuous recording time. Turn off night vision when not needed. Set screen to idle or turn off display.

## SPECIFICATIONS

Brand	CAMMHD
Model Name	CAMMHD-H4
Video Capture Resolution	1920p
Photo Sensor Resolution	4 MP
Viewing Angle	170 Degrees
Battery Capacity	3000mAh
Continuous Recording Time	8-10 hours (at 1080P, night vision off, screen idle)
Charging Time	Approximately 4 hours
Connectivity Technology	USB
Storage	64GB (pre-installed Micro SD)
Item Dimensions	1.03 x 2.08 x 2.99 inches

<b>Item Weight</b>	110 Grams
<b>Color</b>	Black
