MAINTENANCE

To maintain the appearance and structural integrity of your bunk bed, follow these guidelines:

- **Cleaning:** Spot clean the frame as needed. Use a soft, damp cloth for general cleaning. Avoid harsh chemicals or abrasive cleaners that may damage the finish.
- **Hardware:** Periodically check all bolts and screws to ensure they are tight. Re-tighten any loose hardware to maintain stability and safety.
- **Environment:** Avoid placing the bed in direct sunlight or near heat sources, which can cause wood to dry out or warp.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed feels wobbly or unstable	Loose hardware connections.	Check and re-tighten all bolts and screws. Ensure all parts are correctly aligned according to the assembly manual.
Squeaking noises	Loose joints or friction between wood components.	Re-tighten all hardware. If squeaking persists, apply a small amount of paraffin wax or silicone spray to contact points between wooden parts.
Drawers do not slide smoothly	Obstruction in the drawer glides or misaligned tracks.	Clear any debris from the drawer tracks. Ensure the drawers are correctly seated on their rollers and that the tracks are properly installed and aligned.
