MOFII B0G6DWMGS6

MOFII Wireless Keyboard and Mouse Combo (Blackberry Gradient) User Manual

Model: B0G6DWMGS6

INTRODUCTION

This manual provides comprehensive instructions for the MOFII Wireless Keyboard and Mouse Combo. This 2.4G wireless combo offers a stable connection up to 10 meters (33 feet) and features a full-sized 104-key keyboard with round keycaps and a matching wireless mouse. It is designed for plug-and-play convenience across various operating systems.

PACKAGE CONTENTS

Please verify that all items are present in the package:

- Wireless Keyboard x 1
- Wireless Mouse x 1
- USB Nano Receiver x 1
- User Manual x 1

SETUP INSTRUCTIONS

1. **Insert Batteries:** Open the battery compartments on both the keyboard and the mouse. Insert one AA battery into the keyboard and one AA battery into the mouse. Ensure correct polarity. *(Note: Batteries are not included in the package.)*
2. **Connect USB Nano Receiver:** Locate the USB Nano receiver. Plug the receiver into an available USB port on your computer (PC, Laptop, Desktop, etc.).
3. **Automatic Connection:** The keyboard and mouse are designed for plug-and-play functionality. They should automatically connect to your computer within a few seconds after the receiver is plugged in. No additional drivers are typically required.
4. **Test Functionality:** Once connected, test the keyboard by typing and the mouse by moving the cursor and clicking.

Ergonomic Design

Release wrist pressure and work effectively

OPERATING INSTRUCTIONS

Wireless Connection

The combo utilizes a 2.4G wireless connection, providing a stable and reliable link up to 10 meters (33 feet) from the USB Nano receiver. This allows for flexible placement of your keyboard and mouse.

Mouse DPI Adjustment

The wireless mouse supports adjustable DPI settings (Dots Per Inch) for varying cursor sensitivity. You can typically cycle through DPI settings (e.g., 800/1200/1600 DPI) using a dedicated button, usually located near the scroll wheel. This allows you to customize the mouse's responsiveness to your preference.

Image: Wireless mouse highlighting DPI adjustment and silent click features.

Intelligent Auto-Sleep Function

To conserve battery life, both the keyboard and mouse feature an intelligent auto-sleep function. If left inactive for more than one minute, the devices will enter sleep mode. To wake them up, simply click the mouse or press any key on the keyboard.

Ergonomic Design

The keyboard is designed with a slight tilt (approximately 7 degrees) to promote a more natural wrist position, reducing strain during extended use. The mouse also features an ergonomic shape for comfortable grip.

Compatibility

This wireless keyboard and mouse combo is compatible with a wide range of devices and operating systems, including:

- Personal Computers (PC)
- Laptops
- Desktops
- Chromebooks
- Mac (macOS)
- Smart TVs
- Operating Systems: Windows XP/X/7/8/10/2000/ME Vista, iOS, etc.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the surfaces of the keyboard and mouse. For stubborn dirt, a slightly damp cloth can be used, ensuring no liquid enters the device. Avoid harsh chemicals or abrasive cleaners.
- **Battery Replacement:** When the devices stop responding or become intermittent, replace the batteries in both the keyboard and mouse. Ensure you use fresh AA batteries and dispose of old batteries responsibly.
- **Storage:** When not in use for extended periods, remove the batteries to prevent leakage and store the devices in a cool, dry place.

TROUBLESHOOTING

- **Devices Not Responding:**
 - Check if the batteries in both the keyboard and mouse are correctly inserted and have sufficient charge. Replace them if necessary.
 - Ensure the USB Nano receiver is securely plugged into a working USB port on your computer. Try a different USB port.
 - Move the keyboard and mouse closer to the USB receiver to rule out range issues or interference.

- Restart your computer.
- **Keys Not Registering or Delayed Input:**
 - This can sometimes occur if the device has entered sleep mode. Press any key or click the mouse to wake it up.
 - Check battery levels. Low batteries can cause intermittent performance.
 - Ensure there are no obstructions between the devices and the receiver.
 - Avoid using the devices on metallic surfaces, which can interfere with the wireless signal.
- **Mouse Cursor Jumps or is Erratic:**
 - Clean the optical sensor on the bottom of the mouse.
 - Use the mouse on a clean, non-reflective surface or a mouse pad.
 - Check for wireless interference from other 2.4GHz devices.
