ZEUKMXOO Heavy Duty Garage Shelving (12"D x 28"W x 60"H)

ZEUKMXOO Heavy Duty 5-Tier Garage Shelving Unit

Model: 12"D x 28"W x 60"H
Brand: ZEUKMXOO

1. Safety Information

Please read all instructions carefully before assembly and use. Keep this manual for future reference.

- **Do not overload shelves.** Each shelf has a maximum capacity of 480 lbs. The total unit capacity is 2400 lbs.
- Ensure the shelving unit is placed on a flat, stable surface to prevent tipping.
- Distribute weight evenly on each shelf. Avoid placing all heavy items on one side.
- Keep children and pets away from the assembly area.
- Wear gloves during assembly to protect hands from potential sharp edges.
- Do not climb on the shelving unit.

2. Package Contents

Before beginning assembly, ensure all parts are present and undamaged. If any parts are missing or damaged, please contact customer support.

- 5-Tier Storage Shelves (Components for two units)
- Instruction Manual
- Rubber Mallet
- Gloves

3. Assembly Instructions

The ZEUKMXOO shelving unit features a bolt-free interlocking design for quick and easy assembly. No additional tools are required beyond what is provided.

Estimated Assembly Time: Approximately 15 minutes per unit.

1. **Prepare the Area:** Clear a space large enough to assemble the unit. Ensure the floor is level.
2. **Assemble Uprights:** Connect the vertical upright posts. The interlocking frame allows each storage rack to connect without nuts or bolts.
3. **Attach Crossbars:** Insert the horizontal crossbars into the slots on the uprights at your desired shelf height. Use the included rubber mallet to gently tap the crossbars into place, ensuring they are fully seated for better alignment and stability.
4. **Install Shelf Boards:** Once the crossbars for a shelf are securely in place, lay the high-density fiberboard plank upon the crossbars.
5. **Repeat for Remaining Shelves:** Continue attaching crossbars and placing shelf boards for all five tiers.
6. **Final Check:** Once fully assembled, gently push on the unit to ensure all connections are secure and the unit is stable.

4. Operating Instructions

Weight Capacity

Each shelf is designed to hold up to**480 lbs**, with a total unit capacity of**2400 lbs**. This heavy-duty construction allows for storage of power tools, car batteries, heavy toolboxes, and other substantial items. Always distribute weight evenly across the shelf surface.

Image: Illustration highlighting the 480 lbs weight capacity per shelf and 2400 lbs total for the 5-tier unit.

Adjustable Shelving

The shelf heights are fully adjustable in 1-inch increments. This allows you to customize the spacing between shelves to accommodate items of various sizes, from tall containers to smaller bins. To adjust a shelf, carefully remove the items, lift the shelf board, detach the crossbars, reposition them to the desired height, and then re-secure the shelf board.

Image: Visual representation of adjustable metal storage shelves, showing the up and down movement for customization.

Versatile Configuration

The entire unit can be split into two separate, smaller racks. This allows for flexible storage solutions, such as creating two workbench-height units or a smaller tool station and a separate pantry unit.

5. Maintenance

- **Cleaning:** Wipe down metal surfaces with a damp cloth and mild detergent as needed. Avoid abrasive cleaners that could damage the powder-coated finish.
- **Inspection:** Periodically check all connections to ensure they remain secure. Re-tap any loose crossbars with the rubber mallet if necessary.
- **Stability:** Ensure the unit remains on a level surface. If moved, re-verify its stability before loading.

6. Troubleshooting

Unit Wobbles After Assembly

- Ensure all crossbars are fully seated into the upright slots. Use the rubber mallet to tap them firmly into place.
- Verify the unit is on a flat and level surface. Adjust the placement if necessary.
- Check that the non-marring rubber feet are properly installed on all four uprights.

Shelf Boards Do Not Sit Flat

- Ensure the crossbars supporting the shelf board are level and fully inserted into their respective slots.
- Check for any debris or obstructions on the crossbars or the shelf board itself.

Missing Parts

- Carefully check all packaging materials. If parts are still missing, contact ZEUKMXOO customer support.

7. Specifications

Brand	ZEUKMXOO
Model Name	Heavy Duty Garage Shelving
Product Dimensions (D x W x H)	12"D x 28"W x 60"H
Number of Shelves	5
Weight Capacity Per Shelf	480 lbs
Total Weight Capacity	2400 lbs
Material	Engineered Wood (High-Density Fiberboard), Metal
Finish Type	Powder Coated

Color	Black
Special Features	Adjustable, Durable, Heavy Duty, Large Storage Space, Simple Installation
Included Components	5 Tier Storage Shelves, Instruction, Rubber Hammer, Gloves

Image: Detailed view of product features including 0.9mm thick columns, powder coating process, and high-density fiberboard.
