Aoxun 41 Cu.ft

Aoxun 41 Cu.ft Horizontal Storage Shed User Manual

Model: 41 Cu.ft White

Introduction

Thank you for choosing the Aoxun 41 Cu.ft Horizontal Storage Shed. This outdoor storage cabinet is designed to provide a durable, waterproof, and secure solution for organizing your outdoor space. Constructed from high-quality HDPE resin with reinforced features, it offers ample capacity for various items while withstanding diverse weather conditions. Please read this manual carefully before assembly and use to ensure proper installation and long-term performance.

Safety Information

- Always wear appropriate safety gear, such as gloves and eye protection, during assembly.
- Ensure the assembly area is clear of obstructions and provides sufficient space to work safely.
- Do not attempt to assemble the shed in strong winds or adverse weather conditions.
- Keep small parts and packaging materials away from children to prevent choking hazards.
- Ensure the shed is placed on a level, stable surface to prevent tipping.
- Do not store flammable liquids or hazardous materials inside the shed.
- Avoid climbing on the shed or placing excessively heavy items on the lid. The lid is designed to support up to 400 lbs when closed, but excessive weight can cause damage.

Parts List

Before beginning assembly, verify that all parts are present and undamaged. Refer to the included instruction diagram for specific part identification.

- Base Panels
- Side Panels (Front, Back, Left, Right)
- Lid Panels (Left, Right)

- Internal Support Bars (Iron)
- Spring-Assisted Lid Mechanism
- Lockable Latch
- Handles
- Various Screws and Fasteners
- Corner Brackets

Assembly Instructions

The Aoxun Horizontal Storage Shed features a clip-together system for quick setup. Assembly typically takes about 30 minutes for one person. For best results, follow the steps below and refer to the visual aids.

Step 1: Prepare the Base

Unpack all components and lay them out. Ensure you have a clear, level surface for assembly. Begin by connecting the base panels securely.

Image: Main Installation Steps - Step 1 shows the initial connection of base and side panels.

Step 2: Assemble Side Walls

Attach the side panels to the base, ensuring they click firmly into place. It is crucial to install the corner brackets and internal support bars as you build up the walls to ensure structural integrity. This step adds rigidity and strength to the shed.

Step 3: Install the Lid and Latch

Attach the lid panels and the spring-assisted mechanism. This mechanism allows for easy opening and keeps the lid securely open. Finally, install the lockable latch on the front of the shed.

Operating Instructions

Opening the Lid

To open the lid, unlatch the front clasp. The spring-assisted mechanism will then help lift the lid, keeping it open for easy access to the contents. This prevents the lid from accidentally closing while you are loading or unloading items.

Closing and Locking the Lid

To close the lid, gently pull it down until it rests securely on the side panels. Engage the front latch to secure the lid. For added security, a padlock (not included) can be attached to the latch.

Maintenance

- **Cleaning:** Clean the shed periodically with mild soap and water. Avoid abrasive cleaners or harsh chemicals, as these can damage the HDPE resin. Rinse thoroughly with clean water.
- **Inspection:** Regularly inspect the shed for any signs of wear or damage, especially after severe weather. Check all fasteners and hinges to ensure they are tight and functioning correctly.
- **Winter Care:** While the shed is weather-resistant, clearing heavy snow accumulation from the lid can help prolong its lifespan and prevent potential stress on the structure.

Troubleshooting

- **Lid not closing properly:** Check for any obstructions inside the shed or along the edges of the lid. Ensure the shed is on a level surface.
- **Water leakage:** Verify that all panels are securely connected and that the lid closes tightly. Inspect for any cracks or

gaps that may have formed over time.

- **Difficulty with spring-assisted lid:** Ensure the spring mechanism is properly installed and free of debris. If the issue persists, consult the assembly instructions for re-installation.

Specifications

Feature	Detail
Brand	Aoxun
Model	41 Cu.ft
Color	White
Material	HDPE Plastic, Iron Frame
Capacity	41 Cu.ft (approx. 160 Gallons)
Weight Limit (Lid)	400 Pounds
Water Resistance Level	Waterproof
UV Resistance	1000+
Wind Resistance	Level 6
Assembly Required	Yes
