- Periodically check all fasteners and re-tighten if necessary to maintain stability.
- Avoid exposing the cabinet to direct sunlight or extreme temperature changes to prevent warping or discoloration.

8. TROUBLESHOOTING

Common Issues and Solutions:

- **Wobbly Cabinet:**
Ensure all screws are tightened. Check that the cabinet is placed on a level surface. If not, use the included adjustable feet (if applicable) or shims to stabilize. Confirm the anti-tipping kit is properly installed.
- **Doors Not Aligning:**
Check the hinge adjustments. Most hinges allow for minor adjustments to align doors. Refer to the assembly manual for specific hinge adjustment instructions.
- **Difficulty Adjusting Shelves:**
Ensure the shelf pins are fully inserted into the desired holes and are level. Do not force shelves into place.
- **Missing Parts:**
If you find any parts missing or damaged upon unpacking, please contact customer support immediately.
