## 4. SETUP AND ASSEMBLY INSTRUCTIONS

Assembly is designed to be straightforward and can typically be completed within 30 minutes. It is recommended to assemble the bed frame with two people.

### 4.1 Preparation

- Clear an open area for assembly.
- Unpack all components and lay them out on a soft, clean surface to prevent scratches.
- Identify all parts against the package contents list.

### 4.2 Assembly Steps

1. **Assemble the Headboard:** Attach the headboard legs to the upholstered headboard panel using the provided hardware. Ensure all connections are secure. The headboard is adjustable, allowing for different height settings.
2. **Connect Side Rails:** Attach the side rails to the assembled headboard using the designated bolts and nuts. Do not fully tighten yet.

3. **Attach Footboard:** Connect the footboard to the side rails. Ensure the footboard is correctly oriented to accommodate the storage drawers.
4. **Install Central Support:** Place the central steel support beam along the center of the bed frame. Secure it to the headboard and footboard connections.
5. **Insert Wooden Slats:** Lay the 12 strong wooden slats across the bed frame, ensuring even spacing. Secure them in place according to the instructions, typically by pressing them into pre-drilled holes or using provided fasteners. The slats provide solid support for your mattress without the need for a box spring.
6. **Tighten All Connections:** Once all major components are in place, go back and securely tighten all bolts and screws. Do not overtighten.
7. **Install Storage Drawers:** Slide the two storage drawers into their designated compartments under the footboard. The drawers are equipped with smooth mute wheels for easy operation.

### 5.1 Storage Drawers

The bed frame includes two spacious storage drawers located at the foot of the bed. These drawers are designed for easy access and organization.

- To open a drawer, gently pull the handle outwards.
- To close a drawer, push it inwards until it is flush with the footboard.
- The drawers are equipped with wheels for smooth and quiet operation. Avoid overloading the drawers to ensure longevity of the wheels and frame.

## 6. MAINTENANCE

- **Cleaning:** For the upholstered parts, gently vacuum with an upholstery attachment to remove dust. For spills, blot immediately with a clean, dry cloth. For stubborn stains, use a mild fabric cleaner following the product's instructions, testing on an inconspicuous area first.
- **Frame Care:** Wipe the wooden and metal parts with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Tighten Hardware:** Periodically check and retighten all bolts and screws to ensure the bed frame remains stable and noise-free.
- **Slats:** Ensure all wooden slats are properly seated and not damaged. Replace any broken slats immediately to maintain mattress support.

## 7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable.	Loose hardware; uneven floor.	Check and tighten all bolts and screws. Ensure the bed is on a level surface.
Squeaking noises.	Loose connections; slats rubbing.	Tighten all hardware. Ensure slats are properly seated and not rubbing against the frame. Apply felt pads if necessary.
Storage drawers do not slide smoothly.	Overloaded drawer; debris in tracks; damaged wheels.	Reduce drawer contents. Clean any debris from the wheel area. Inspect wheels for damage and contact support if needed.
Mattress sagging.	Damaged or improperly installed slats; mattress too heavy.	Verify all slats are correctly installed and undamaged. Ensure mattress weight is within recommended limits.
