Aoxun 12x6FT Hardtop Gazebo

Aoxun 12x6FT Hardtop Gazebo Instruction Manual

Model: 12x6FT Hardtop Gazebo | Brand: Aoxun

Introduction

This manual provides detailed instructions for the assembly, operation, and maintenance of your Aoxun 12x6FT Hardtop Gazebo. This all-weather outdoor BBQ canopy features a sloping steel roof, two side shelves, and hooks, designed to create a dedicated outdoor kitchen space for your patio, backyard, or deck.

Please read all instructions carefully before beginning assembly and retain this manual for future reference.

Safety Information

- Always secure the gazebo to a stable foundation to prevent it from tipping over in windy conditions. Expansion bolts are included for secure anchoring.
- Exercise caution when handling the metal roof panels and frame components, as edges may be sharp. Wear appropriate protective gloves during assembly.
- The metal roof may become hot after prolonged exposure to sunlight. Avoid direct contact with the roof surface when hot.
- Ensure all fasteners are tightened securely after assembly and periodically check for any loose connections.
- Do not hang excessively heavy items on the side shelves or hooks beyond their specified weight capacities.

Package Contents

Your Aoxun Hardtop Gazebo is shipped in multiple packages and includes all necessary components and hardware for assembly. Please verify all parts are present and undamaged before beginning assembly.

Typical components include:

- Steel Frame Components (posts, beams, braces)
- Metal Roof Panels
- Side Shelves (2 units)
- Utensil Hanging Bar and Hooks
- Assembly Hardware (screws, bolts, washers, nuts)
- Anchoring Hardware (expansion bolts)
- Instruction Manual

If any parts are missing or damaged, please contact customer support.

Setup and Assembly

Assembly of the Aoxun Hardtop Gazebo requires careful attention to detail. It is recommended that 2-3 people participate in the assembly process to ensure stability and ease of construction.

Preparation:

- Choose a level and stable location for your gazebo. The gazebo can be installed against a wall or as a freestanding unit.
- Clear the assembly area of any obstructions.
- Unpack all components and lay them out, verifying against the parts list in the included manual.
- Gather necessary tools (e.g., screwdriver, wrench, ladder).

Assembly Steps:

1. **Frame Assembly:** Begin by assembling the main steel frame. Pay close attention to the orientation of each piece as depicted in the detailed instructions. The frame includes reinforced bracing for structural integrity.
2. **Roof Panel Installation:** The roof section is typically the most complex part of the assembly. Two people are required to hold the panels in place while securing them. Ensure proper alignment for efficient rainwater runoff.
3. **Side Shelves and Hooks:** Attach the side shelves and utensil hanging bar according to the instructions. The shelves are designed to support up to 30 kg (66 lbs) and the hooks up to 7 lbs each.
4. **Anchoring:** Secure the gazebo to your chosen foundation using the provided expansion bolts through the pre-drilled bases. This step is crucial for stability, especially in windy conditions.

Note: Assembly can take several hours. Allocate sufficient time and follow the instructions precisely to ensure correct and safe installation.

- PRODUCT DETAILS -

Operating Instructions

Utilizing the BBQ Zone:

The 12x6ft area under the gazebo is designed to accommodate standard BBQ grills and equipment, creating a dedicated outdoor cooking space. Position your grill centrally to benefit from the overhead protection.

Side Shelves and Hooks:

Use the built-in side shelves for food preparation, holding utensils, or placing drinks. The shelves have a weight capacity of 30 kg (66 lbs). The integrated utensil hanging bar and two heavy-duty hooks (7 lbs capacity each) provide convenient storage for grilling tools, towels, or decorative lighting.

- Spacious Tabletop
- Outstanding load-bearing structure design
- Stable structure design, fixed without any shaking

Image: A visual representation of the side tabletop, highlighting its spaciousness and stable design, with dimensions of 61.02 inches in length and 10.63 inches in width.

Weather Protection:

The sloped metal roof is designed for efficient rainwater runoff, preventing water accumulation and promoting better airflow to dissipate heat and smoke from grilling. The corrosion-resistant metal roof with a powder-coated finish provides protection against various weather conditions.

Image: An illustration demonstrating the gazebo's efficient drainage system, showing rainwater being quickly channeled along the eaves to prevent accumulation.

Image: Visual representation of the gazebo's performance in different weather conditions, highlighting its wind resistance rating of up to 38 MPH and a maximum snow depth capacity of 7 inches.

Maintenance

- **Cleaning:** Clean the metal frame and roof panels periodically with a mild soap solution and water. Rinse thoroughly and dry to prevent water spots and maintain the finish. Avoid abrasive cleaners or harsh chemicals.
- **Inspection:** Regularly inspect all bolts, screws, and connections to ensure they remain tight. Re-tighten any loose fasteners to maintain structural integrity.
- **Winter Care:** While the gazebo has a snow load capacity, it is advisable to clear heavy snow accumulation from the roof to prevent excessive stress on the structure.
- **Anchoring:** Periodically check the ground anchors to ensure they are still securely fastened, especially after strong winds or heavy rainfall.

Troubleshooting

- **Parts Do Not Fit:** If components do not align or fit together easily, re-check the assembly steps and part orientation in the instruction manual. Do not force parts, as this can cause damage. Ensure you are using the correct hardware for each step.
- **Gazebo Feels Unstable:** Verify that all frame connections are securely tightened. Ensure the gazebo is properly anchored to a stable foundation using the provided expansion bolts. Uneven ground can also contribute to instability; ensure the installation surface is level.
- **Water Accumulation on Roof:** The sloped roof is designed for drainage. If water accumulates, check for any obstructions on the roof panels or in the eaves that might impede runoff. Ensure roof panels are correctly installed and overlapping as per instructions.
- **Missing or Damaged Parts:** If you discover any missing or damaged parts during unpacking or assembly, do not proceed with assembly. Contact Aoxun customer support immediately for assistance.

Specifications

Feature	Detail
Brand	Aoxun
Model	12x6FT Hardtop Gazebo
Material	Metal (All-steel frame, metal roof)
Product Dimensions (L x W x H)	144"L x 72"W x 86.04"H (12 ft x 6 ft x 7.17 ft)
Item Weight	202 Pounds
Color	Black
Water Resistance Level	Waterproof
Ultraviolet Light Protection	Yes
Assembly Required	Yes (Recommended 2-3 people)
Wind Resistance Rating	7 (31-38 mph)
Snow Load Capacity	7.2 lb/ft²
Side Shelf Capacity	30 kg (66 lbs)
Hook Capacity (each)	7 lbs

Warranty and Support

Aoxun is committed to providing quality products. While specific warranty details are not provided in this manual, please retain your proof of purchase for any warranty claims. For any questions regarding assembly, missing parts, or product performance, our dedicated customer support team is ready to assist you.

Please refer to the contact information provided with your purchase or visit the official Aoxun website for support.
