Blukar K9183

Blukar K9183 Rechargeable Mini EDC Flashlight User Manual

Brand: Blukar | Model: K9183

1. INTRODUCTION

Thank you for choosing the Blukar K9183 Rechargeable Mini EDC Flashlight. This compact and powerful device is designed for everyday carry, offering reliable illumination in various situations. This manual provides essential information for the proper setup, operation, and maintenance of your flashlight.

2. PRODUCT OVERVIEW

The Blukar K9183 is a versatile mini flashlight featuring a super bright output and three distinct lighting modes. Its compact design makes it ideal for portability, while its durable and waterproof construction ensures performance in diverse environments. The integrated USB-C rechargeable battery and smart indicator light provide convenient power management.

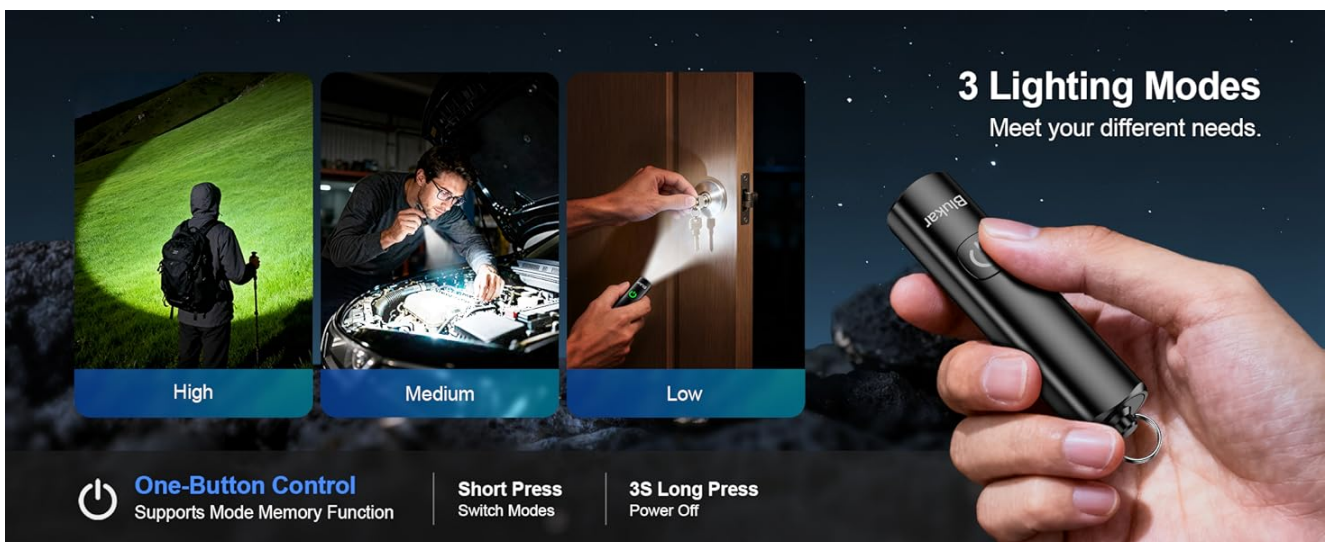

Image: Blukar Mini EDC Flashlight with key ring and key, highlighting features like 360LM output, 48M beam distance, 27g weight, 1.5M drop test, and IPX6 waterproof rating.

Key Features:

- **Super Bright & 3 Lighting Modes:** Provides a powerful beam with High, Medium, and Low settings for various illumination needs.
- **USB-C Rechargeable & Smart Indicator:** Built-in 130 mAh battery charges via USB-C. Red light indicates

charging/low battery; green light indicates full charge/active use.

- **Convenient Shutdown & Memory Function:** Two shutdown methods (short press after 8s, or long press for 3s). Remembers the last used lighting mode.
- **Waterproof & Durable:** IPX6 waterproof rating and high-strength aluminum construction ensure resilience against water and impacts.
- **Mini & Portable:** Lightweight (27g/0.95oz) and compact design with a circular keyring for easy attachment to keys, backpacks, or pockets.

3. WHAT'S INCLUDED

Upon opening your Blukar K9183 package, you should find the following items:

- Blukar K9183 Mini EDC Flashlight
- USB-C Charging Cable
- User Guide (this manual)

Video: Unboxing the Blukar Mini Flashlight, showing the flashlight, USB-C cable, and user guide included in the package.

4. SETUP

Initial Charging:

1. Locate the USB-C charging port on the flashlight. This is typically covered by a small rubber flap to maintain its waterproof rating.
2. Open the rubber flap and insert the provided USB-C cable into the port.
3. Connect the other end of the USB-C cable to a compatible USB power source (e.g., computer, wall adapter, power bank).
4. The power switch on the flashlight will illuminate red, indicating that it is charging.
5. Once fully charged (approximately 2 hours), the indicator light will turn green.
6. Disconnect the charging cable and securely close the rubber flap to protect the port.

5. OPERATING INSTRUCTIONS

Power On/Off and Mode Selection:

The Blukar K9183 features a single button for all operations, including power control and mode switching. It also includes a memory function that recalls the last used brightness setting.

1. **To Turn On:** Press the power button once. The flashlight will turn on in the last used brightness mode (due to the memory function).
2. **To Switch Modes:** While the flashlight is on, short press the power button to cycle through the brightness modes: High → Medium → Low.
3. **To Turn Off (Method 1 - Quick Off):** If the flashlight has been on for more than 8 seconds in any mode, a single short press of the power button will turn it off.
4. **To Turn Off (Method 2 - Instant Off):** In any mode, a long press (approximately 3 seconds) of the power button will turn the flashlight off immediately.

Video: Demonstration of the Blukar Mini Flashlight's operation, including turning it on, cycling through brightness modes, and using the memory function.

6. MAINTENANCE

To ensure the longevity and optimal performance of your Blukar K9183 Flashlight, follow these maintenance guidelines:

- **Cleaning:** Wipe the flashlight body with a soft, damp cloth. Avoid using abrasive cleaners or solvents that could damage the finish or internal components.
- **Charging Port:** Keep the USB-C charging port clean and free of debris. Always ensure the rubber flap is securely closed when not charging to maintain its IPX6 waterproof rating.
- **Storage:** Store the flashlight in a cool, dry place when not in use. If storing for an extended period, ensure it is fully charged before storage and recharge it every few months to preserve battery health.
- **Avoid Extreme Conditions:** While durable and waterproof, avoid exposing the flashlight to extreme temperatures or prolonged submersion in water.

7. TROUBLESHOOTING

If you encounter any issues with your Blukar K9183 Flashlight, please refer to the following common troubleshooting steps:

- **Flashlight Not Turning On:**
 - Ensure the battery is charged. Connect it to a power source and check if the charging indicator light turns red.

- Verify that the power button is being pressed correctly (a single short press to turn on, or a long press if it was previously turned off with a long press).

- **Light Output is Dim:**

- The battery might be low. Recharge the flashlight until the indicator light turns green.
- Cycle through the brightness modes to ensure it's not set to the lowest setting.

- **Charging Issues:**

- Check the USB-C cable for any damage and ensure it is properly connected to both the flashlight and the power source.
- Try a different USB power source or charging cable to rule out external issues.
- Ensure the charging port is clean and free of obstructions.

- **Water Intrusion:**

- Although IPX6 rated, severe conditions or improper sealing of the charging port can lead to water entry. If water is suspected, turn off the device immediately and allow it to dry completely before attempting to use or charge it again.

If these steps do not resolve the issue, please contact Blukar customer support for further assistance.

8. SPECIFICATIONS

Feature	Detail
Model Number	K9183
Brand	Blukar
Color	Black
Material	Aluminum
Power Source	Battery Powered (Lithium Ion)
Battery Capacity	130 mAh (Built-in)
