## Aeitto ZBJ1218

# Aeitto Nugget Ice Maker Countertop (Model ZBJ1218) Instruction Manual

Model: ZBJ1218

## 1. INTRODUCTION

---

Thank you for purchasing the Aeitto Nugget Ice Maker. This manual provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your ice maker. Please read these instructions thoroughly before use and retain them for future reference.

## 2. SAFETY INSTRUCTIONS

To prevent injury to persons or damage to the appliance, always observe basic safety precautions, including the following:

- Read all instructions before using the appliance.
- Do not touch the evaporator or ice during operation to avoid frostbite.
- Do not immerse the appliance, power cord, or plug in water or other liquids.
- Close supervision is necessary when any appliance is used by or near children.
- Unplug the appliance from the outlet when not in use, before cleaning, or before performing any maintenance.

- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner. Contact customer service for assistance.
- Do not use outdoors. This appliance is for indoor household use only.
- Do not place the appliance on or near a hot gas or electric burner, or in a heated oven.
- Ensure the power cord is not draped over the edge of a table or counter, or touching hot surfaces.
- Do not use the appliance for anything other than its intended purpose.
- Use only potable water in the water tank.
- This appliance uses R600a refrigerant. Handle with care.

### **3. PRODUCT COMPONENTS**

---

Your Aeito Nugget Ice Maker includes the following main components:

- Ice Maker Unit
- Ice Basket
- Ice Scoop

# Designed for Your Countertop

Enjoy Ice without Noisy Disruption

Figure 3.1: Main components and dimensions of the ice maker.

## 4. SETUP

- Unpacking:** Carefully remove all packaging materials and inspect the ice maker for any damage. Ensure all accessories (ice basket, ice scoop) are present.
- Placement:** Place the ice maker on a stable, level surface away from direct sunlight and heat sources. Ensure there is at least 4 inches (10 cm) of space around the unit for proper ventilation.
- Refrigerant Settling:** After transportation, allow the ice maker to stand upright for at least 2-4 hours before plugging it in. This allows the refrigerant to settle.
- Initial Cleaning:** Before first use, clean the interior of the ice maker. Refer to the 'Cleaning and Maintenance' section for detailed instructions.

5. **Power Connection:** Plug the power cord into a grounded electrical outlet.

## 5. OPERATION

---

Follow these steps to operate your Aeitto Nugget Ice Maker:

1. **Add Water:** Open the top lid and remove the ice basket. Pour potable water into the water tank up to the 'MAX' fill line. Do not overfill.
2. **Replace Basket and Close Lid:** Place the ice basket back into position and close the top lid securely.
3. **Start Ice Production:** Press the 'On/Off' button on the control panel. The 'Making Ice' indicator light will illuminate.
4. **First Batch:** The first cycle of ice production typically takes about 6 minutes. Discard the first few batches of ice to ensure optimal hygiene and taste.
5. **Indicator Lights:**
  - **Making Ice:** Green light indicates the unit is actively making ice.
  - **Add Water:** Red light indicates the water tank is low and needs refilling. The unit will pause operation until water is added.
  - **Ice Full:** Green light indicates the ice basket is full. The unit will pause operation until ice is removed.
6. **Continuous Ice Making:** The ice maker features an induction infrared sensor. When the ice basket is full, ice production will halt. It will resume automatically approximately 30 minutes after the ice level drops.
7. **Ice Storage:** The ice maker does not have a refrigeration function to keep ice frozen. It is recommended to transfer ice to a freezer for long-term storage.

## 6. CLEANING AND MAINTENANCE

---

Regular cleaning ensures optimal performance and hygiene of your ice maker.

### 6.1 Automatic Cleaning

1. Ensure there is water in the tank.
2. Press and hold the 'Clean' button for 5 seconds to activate the self-cleaning cycle.
3. The cleaning cycle will run for a few minutes. Once complete, drain the water from the unit.

### 6.2 Manual Cleaning

For a more thorough cleaning, especially of the water tank and internal components:

1. Unplug the ice maker from the power outlet.
2. Drain all water from the unit.
3. Locate the flip-open back cover. Use the ice scoop or a similar tool to gently pry open the back cover, utilizing the lever principle.
4. Clean the interior surfaces, water tank, and ice basket with a soft cloth and a mild detergent solution. Rinse thoroughly with clean water.
5. Ensure all detergent residue is removed before reassembling.
6. Close the back cover securely.

Keep it fresh, keep it simple

Figure 6.1: Dual cleaning system for comprehensive hygiene.

## 6.3 Descaling

If hard water is used, mineral deposits may accumulate. Descale the unit periodically using a solution of water and vinegar or a commercial descaling agent designed for ice makers. Follow the descaling product's instructions carefully.

## 7. TROUBLESHOOTING

Before contacting customer service, please refer to the following troubleshooting guide:

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Ice maker not working	No power; 'Add Water' light on; 'Ice Full' light on.	Check power connection; Add water to the tank; Remove ice from the basket.
'Add Water' light on, but water is present	Water level sensor malfunction or obstruction.	Ensure water level is above the sensor; Clean the sensor area.
Ice production is slow or ice is small	High ambient temperature; Poor ventilation; Mineral buildup.	Ensure proper ventilation; Clean the unit and descale if necessary.
Unusual noise during operation	Unit not level; Internal component issue.	Ensure the unit is on a level surface; If noise persists, contact customer service.

## 8. SPECIFICATIONS

Feature	Specification
Model Name	ZBJ1218
Brand	Aeitto
Product Dimensions (D x W x H)	8.66" x 12.44" x 12.8"
Ice Production Capacity	Up to 42 lbs per 24 hours
Water Tank Capacity	1.5 Liters
Ice Basket Capacity	2 lbs
Refrigerant	R600a
Item Weight	20.5 Pounds
Noise Level	Below 45 dB

## 9. WARRANTY AND SUPPORT

For warranty information or technical support, please refer to the warranty card included with your product or contact Aeitto customer service directly. Keep your purchase receipt as proof of purchase.
