4. SETUP AND INSTALLATION

Proper installation is crucial for the optimal performance and longevity of your smart toilet. It is recommended to have a professional plumber perform the installation. Ensure your bathroom meets the required dimensions and plumbing specifications.

4.1 Pre-Installation Checks

- Verify product dimensions: 22.83"D x 15.16"W x 18.11"H.
- Ensure the distance from your wall to the center of your mounting flange is a full 12 inches.
- Confirm your water supply line is at least 8 inches away (side to side) from the center of the mounting flange.

4.2 Installation Steps

Refer to the included Installation Manual for detailed, step-by-step instructions. The process generally involves:

1. Preparing the floor drain and mounting area.
2. Installing the PVC flange ring and securing it.
3. Applying installation adhesive to the toilet base.
4. Carefully positioning and installing the toilet unit over the flange.
5. Connecting the water supply line to the toilet's three-way adapter and angle valve.
6. Connecting the spare battery and plugging the toilet into a power outlet.

6. MAINTENANCE

Regular maintenance ensures the longevity and hygienic operation of your smart toilet.

- **Nozzle Self-Cleaning:** The bidet nozzle performs an automatic self-cleaning cycle before and after each use.
- **Manual Nozzle Cleaning:** The nozzle is detachable for manual cleaning with a brush, ensuring thorough hygiene.
- **Foam Cleaner/Detergent:** The removable panel at the back of the toilet houses a foam cleaner reservoir. You can refill it with effervescent tablets or a few drops of dish soap.
- **Water Filter:** The back panel also provides access to the water filter, which should be checked and replaced as per the maintenance schedule in the full manual.

7. TROUBLESHOOTING

If you encounter any issues, please refer to the following common troubleshooting tips:

- **Remote Control Not Responding:** If the remote control does not respond the first time you use it, you will need to code the remote control to the toilet. First, press the TESE button on the plug to turn off the power, then press the RESET button on the plug to turn on the power. Within 5 seconds after turning on the power, press the buttock cleaning button on the right side of the toilet. After hearing a (Di), immediately press any button on the remote control, and once again, you will hear a (Di), which means that the remote control has been paired successfully.
- **Power Outage:** The toilet maintains full function during power outages via a manual side knob and a backup battery for flushing.
- **Water Connection Issues:** Some users have reported needing specific fittings for their supply lines. Consult a plumber if standard connections do not fit.
