Alikali B0G9RJ2VG7

Alikali 9-inch Car Stereo Instruction Manual

FOR CHEVY MALIBU (2011-2015) - MODEL B0G9RJ2VG7

1. Introduction

This manual provides detailed instructions for the installation, operation, maintenance, and troubleshooting of your Alikali 9-inch Car Stereo system, specifically designed for Chevy Malibu models from 2011 to 2015. Please read this manual thoroughly before installation and use to ensure proper function and safety.

For Chevrolet Malibu 2012-2015

Before installation

After installation

2. Setup and Installation

The Alikali 9-inch Car Stereo is custom-fit for Chevy Malibu 2011-2015. Ensure your vehicle model and year match before proceeding. For specific wiring details, refer to the video below and the included instruction manual.

2.1. Component Overview

Image: Overview of all included components for the car stereo system.

2.2. Wiring Reference Video

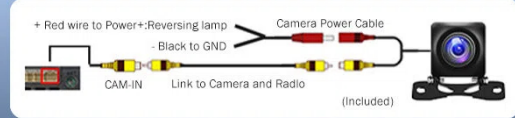

Video: This video provides a visual guide for wiring connections. For detailed instructions, consult the included instruction manual.

2.3. Rear Camera Installation

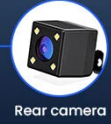

The system supports CVBS reversing input. If your OEM camera is incompatible, use the included camera. Connect the camera to the dedicated camera input and ensure the reversing light wire is correctly connected for automatic display when reversing.

Rear Camera Installation

- A IN-DASH CAR STEREO
- B RED WIRE TO POWER+:REVERSING LAMP; - BLACK TO GND
- C REAR CAMERA

Reversing Light (Positive Lead)

Please Note!
 Only supports OEM CVBS 720P camera.
 360 degree panoramic camera is not supported.
 If your OEM camera is incompatible, please use the included camera.

3. Operating Instructions

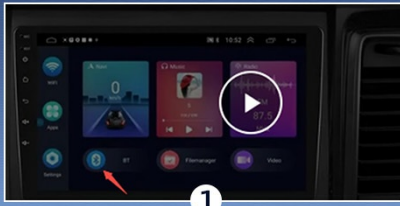

3.1. Wireless Carplay & Android Auto Connection

This unit supports both wireless Carplay and Android Auto. Connection can be established via Bluetooth or ZLINK application.

Video: Guide to connecting your smartphone for Wireless Carplay or Android Auto.

Bluetooth Connection

Bluetooth Connection

1. Turn On Carplay's Bluetooth.

2. Connect Phone's Bluetooth to Carplay's.

3. Note: After the Bluetooth connection is successful, the 8 words mobile phone audio and media audio will be displayed, which means that the Bluetooth connection is successful. If it does not appear, restart the Bluetooth.

Image: Bluetooth connection steps.

WiFi Connection (if Bluetooth fails)

WiFi Connection

1. Find WiFi on Carplay's Android setting, then connect Carplay's WiFi via your phone..

2. When the device name is displayed, the WiFi connection is successful.

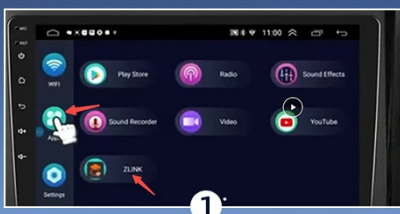

3. After manually connecting to the WiFi of the vehicle, the vehicle needs to delete the history record, and then click ZLINK.

Image: WiFi connection steps.

ZLINK Application

Zlink Connection

1. Find Zlink APP on Carplay.

2. Click to connect. If the connection is not successful, a manual WiFi connection is required.

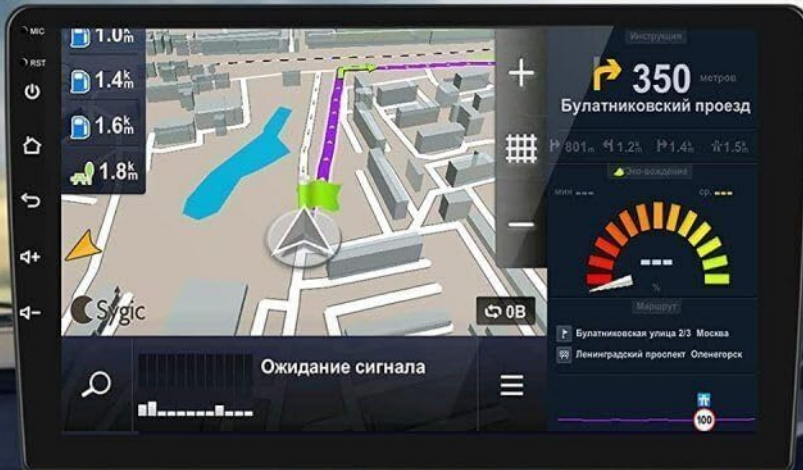

3. Successful if it changes to Carplay or Android Auto.

Image: ZLINK connection steps.

3.2. GPS Navigation

The unit features built-in GPS with support for offline maps (downloadable via Play Store) and online navigation via Google Maps when connected to WiFi.

GPS NAVIGATION

ONline/OFFline maps.

WiFi HOTSPOT

Image: GPS Navigation and WiFi Hotspot features.

Live Map Navigation

Live traffic, speed cams & road closures;
offline maps work in remote areas with no network,
no navigation disconnection.

5. Maintenance

To ensure the longevity and optimal performance of your Alikali Car Stereo, follow these maintenance guidelines:

- **Cleaning the Screen:** Use a soft, lint-free cloth to gently wipe the touchscreen. Avoid abrasive cleaners or solvents that may damage the screen.
- **Software Updates:** Periodically check for software updates through the system settings or the manufacturer's website to ensure you have the latest features and bug fixes.
- **Environmental Care:** Avoid exposing the unit to extreme temperatures, direct sunlight for prolonged periods, or excessive moisture.
- **Cable Connections:** Ensure all cables are securely connected. Loose connections can lead to intermittent functionality.

6. Troubleshooting

If you encounter issues with your car stereo, refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
No Power	Loose power connection, blown fuse.	Check power cable connections. Inspect and replace any blown fuses.
No Sound	Volume too low, incorrect audio source, loose speaker wires.	Increase volume. Select correct audio source. Check speaker wire connections.
Bluetooth/Carplay/Android Auto Disconnection	Interference, incorrect pairing, software glitch.	Ensure device is within range. Re-pair the device. Restart the car stereo and your phone. Try manual WiFi connection if Bluetooth fails.
GPS Not Working	Poor satellite signal, outdated maps, incorrect settings.	Ensure GPS antenna is properly installed and has a clear view of the sky. Update maps if necessary. Check GPS settings.
Rear Camera Not Displaying	Incorrect wiring, incompatible camera, faulty camera.	Verify camera input and reversing light wire connections. Ensure you are using the compatible or included CVBS camera.

If the problem persists after attempting these solutions, please contact customer support.
