6. Troubleshooting

- **No Power:** Ensure the AC power adapter is securely connected to both the TV Box and a working power outlet.
- **No Display:** Verify the HDMI cable is firmly connected to both the TV Box and your television. Check that your TV is set to the correct HDMI input source.

- **Wi-Fi Connectivity Issues:** Go to Settings > Network & Internet to re-scan for networks and ensure the correct password is entered. Try restarting your router.
- **App Performance:** If an app is slow or crashing, try clearing its cache in Settings > Apps. If issues persist, consider uninstalling and reinstalling the app.
- **Remote Control Not Responding:** Check the batteries in the remote control. Ensure there are no obstructions between the remote and the TV Box.
- **Factory Reset:** As a last resort for persistent software issues, you can perform a factory reset via Settings > Device Preferences > Reset. This will erase all data and restore the device to its original factory settings.

7. Maintenance

- Keep the device in a well-ventilated area to prevent overheating.
- Avoid exposing the device to direct sunlight, high temperatures, or humidity.
- Clean the device with a soft, dry cloth. Do not use liquid cleaners or aerosols.
- Regularly clear app caches and unused applications to maintain optimal performance.

8. Warranty and Support

This product does not include a manufacturer's warranty as per the provided information. For further assistance or support, please refer to the GREVA brand store on Amazon or contact their customer service directly.
