4. SETUP AND ASSEMBLY

While the bed is designed for straightforward setup, careful attention to each step ensures stability and safety.

1. **Unpack Components:** Carefully remove all parts from the packaging. Lay them out on a clean, soft surface to prevent scratches.
2. **Assemble Frame:** Connect the headboard, footboard, and side rails using the provided hardware. Ensure all bolts are finger-tightened initially.
3. **Attach Small Door:** Secure the small door panel to the designated side rail using the hinges. Ensure the door swings freely.
4. **Install Door Latch:** Attach the latch mechanism to the door and frame, ensuring it securely holds the door closed.

5. **Place Slats:** Position the plywood slats across the bed frame. The slats are designed to support the mattress and keep it elevated from the floor.

Image 4.2: The plywood slats provide mattress support.

6. **Final Tightening:** Once all components are in place, fully tighten all bolts and screws using the appropriate tool. Do not overtighten.
7. **Placement:** Place the assembled bed on a flat, stable surface. Ensure there is adequate space around the bed, especially for the door to open and close freely.

5. OPERATING INSTRUCTIONS

The Bellemave Montessori Floor Bed is designed for ease of use and child safety.

- **Access Door:** The small door allows for easy entry and exit for children. To open, unlatch the mechanism and swing the door outwards. To close, swing the door back into place and secure the latch.

Image 5.1: The small door provides convenient access.

- **Mattress Placement:** Place a standard twin-size mattress directly onto the slats. The low profile design ensures the mattress is close to the floor, reducing fall risks.
- **Slat Functionality:** The slats elevate the mattress from the floor, promoting air circulation and preventing moisture buildup. If desired, the slats can be removed to place a foam board directly on the floor, creating a play space.

6. MAINTENANCE

Regular maintenance will prolong the life and ensure the safety of your floor bed.

- **Cleaning:** Wipe down the bed frame with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that may damage the finish.
- **Hardware Check:** Periodically inspect all screws, bolts, and connections. Re-tighten any loose hardware to maintain structural integrity.
- **Slat Inspection:** Check the slats for any signs of damage or wear. Replace any broken slats immediately to ensure proper mattress support.

7. TROUBLESHOOTING

If you encounter any issues, refer to the following troubleshooting tips:

- **Bed feels wobbly:** Ensure all assembly hardware is fully tightened. Check that the bed is placed on a level surface.
- **Door not closing/latching properly:** Inspect the hinges and latch for proper alignment. Adjust screws if necessary. Ensure no obstructions are preventing the door from closing.
- **Squeaking noises:** Re-tighten all bolts. Apply a small amount of lubricant (e.g., paraffin wax) to joints if squeaking persists.
