TROUBLESHOOTING

Charging Station Issues:

- **No Power:** Ensure the power cord is securely plugged into both the table and the wall outlet. Check if the wall outlet is functional by plugging in another device.
- **Device Not Charging:** Verify that your device's charging cable is properly connected to both the device and the table's port. Try a different port or cable to rule out cable or device issues.
- **Overload:** If multiple high-power devices are connected, the charging station may temporarily shut off to prevent overload. Unplug some devices and try again.

Structural Issues:

- **Wobbly Table:** Check all assembly screws and tighten any that are loose. Ensure the table is placed on a flat, even surface.
- **Drawers Sticking:** Ensure the drawer slides are properly aligned and free of obstructions. Check that the drawer is not overloaded.
