2. PRODUCT FEATURES

- **Compatibility:** Exclusively designed for Honda Civic 2016-2021 models, retaining factory steering wheel controls, reverse camera, and vehicle information display.
- **High-Performance Processor:** Equipped with an 8-Core processor, 4GB RAM, and 64GB internal storage for fast boot-up, seamless multitasking, and quick app switching.
- **Display:** 9-inch 1280*800 HD Touchscreen for clear visuals and responsive interaction.
- **Smartphone Integration:** Supports Wireless/Wired Apple CarPlay and Android Auto for hands-free access to navigation, music, calls, and messages.
- **Navigation:** Built-in GPS navigation with support for both online and offline maps.
- **Connectivity:** 5G WiFi for real-time updates and app downloads, Bluetooth 5.0 for stable connections, and USB ports.
- **Audio Quality:** FM/AM RDS radio with a 36-band EQ DSP for customizable HiFi-level sound.
- **Safety Features:** Includes a 1080P AHD backup camera with night vision, water resistance, and a 170° wide viewing angle, automatically displaying the rear view when reversing.
- **User Interface:** Supports split-screen functionality and mirror link.

For Honda Civic

(2016-2021)

Image 1: Core Specifications. This image highlights the key internal components of the Jufodca car radio, including its 4GB RAM, 64GB ROM, Android 13 operating system, Bluetooth 5.0, and 8-core processor.

4GB RAM + 64GB ROM

Image 2: Wireless CarPlay and Android Auto. The image shows the car radio's display with both Apple CarPlay and Android Auto interfaces, demonstrating seamless smartphone integration.

Image 3: Split Screen Functionality. This image illustrates the split-screen feature, allowing users to view two applications, such as a music player and a navigation map, concurrently on the 9-inch display.

3. SETUP AND INSTALLATION

The Jufodrca car radio is designed for a plug-and-play installation in compatible Honda Civic models (2016-2021). While the process is generally straightforward, professional installation is recommended if you are unfamiliar with car audio systems.

3.1. Pre-Installation Checklist

- Ensure the vehicle's ignition is off and the battery is disconnected.
- Gather all necessary tools (e.g., trim removal tools, screwdrivers).
- Verify all components listed in the product packaging are present.

3.2. Connection Steps

1. **USB Cables:** Connect the provided 6-pin and 4-pin USB cables to their respective ports on the back of the head unit.
2. **Rear Camera Signal:** Connect the 10-pin reversing video input interface for the backup camera.
3. **4G Antenna:** Screw the 4G antenna into its designated port.
4. **GPS Antenna:** Screw the GPS antenna into its designated port.
5. **Radio Antenna:** Connect the factory radio antenna to the ANT port.
6. **Power Cable:** Connect the main power cable (plug and play) to the 16-pin port on the head unit.

Video 2: Installation Guide. This video demonstrates the step-by-step process of connecting the various cables and antennas to the Jufodra car radio unit.

Image 4: Before and After Installation. This image shows the original Honda Civic dashboard setup alongside the upgraded dashboard with the Jufodra 9-inch car radio installed, illustrating the visual transformation.

4. OPERATING INSTRUCTIONS

4.1. Wireless/Wired CarPlay & Android Auto

Connect your iPhone or Android phone wirelessly or via USB to access navigation, music, calls, and messages directly on the car radio screen. Use voice commands (Siri or Google Assistant) for hands-free operation.

4.2. GPS Navigation

Utilize the built-in GPS for navigation. The system supports both online maps (via 5G WiFi connection) and offline maps. Access real-time traffic updates and plan routes efficiently.

4.3. FM/AM DSP Radio & HiFi Sound

Tune into FM/AM radio stations. The integrated 36-band EQ DSP allows for extensive audio customization. Adjust

sound settings to your preference for an enhanced listening experience.

4.4. Steering Wheel Control (SWC)

The unit retains compatibility with your vehicle's original steering wheel controls. This allows you to manage audio volume, switch tracks, answer calls, and control other functions without taking your hands off the wheel.

4.5. Split Screen Functionality

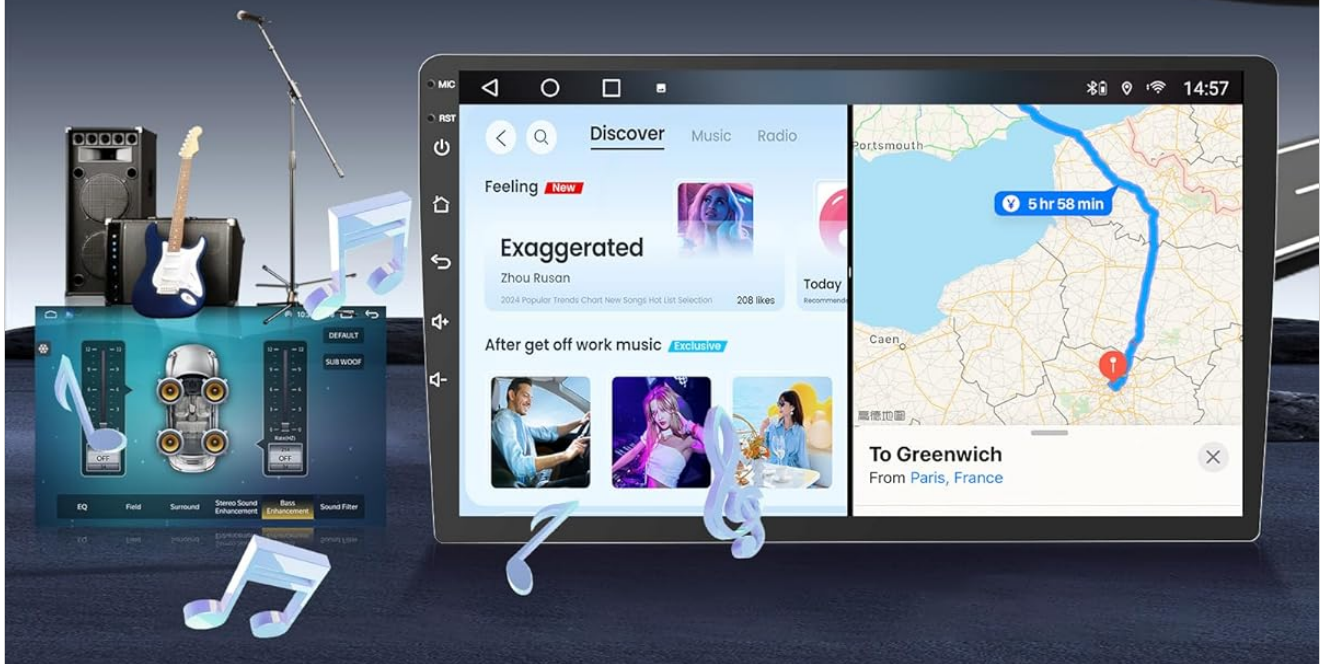

Activate split-screen mode to run two applications simultaneously, such as navigation on one side and a music player on the other, enhancing multitasking capabilities.

4.6. 1080P Rear View Camera

When shifting into reverse, the screen automatically displays the feed from the 1080P AHD backup camera, providing a clear view of the area behind your vehicle for safer parking and maneuvering.

Image 5: 1080P Backup Camera View. This image displays the car radio screen showing the clear, wide-angle view from the 1080P backup camera, complete with parking guidelines for assistance.

5. MAINTENANCE

- **Screen Cleaning:** Use a soft, lint-free cloth to clean the touchscreen. Avoid abrasive cleaners or solvents.
- **Software Updates:** Periodically check for Over-The-Air (OTA) software updates to ensure optimal performance and access to new features. Connect to a stable 5G WiFi network for updates.

- **General Care:** Avoid exposing the unit to extreme temperatures or direct sunlight for prolonged periods.

1080P Backup Camera

The car stereo comes with a night vision camera that automatically displays the rearview mirror when you pull into reverse.

Image 6: 5G WiFi and OTA Updates. This image illustrates the car radio's capability for 5G WiFi connectivity and Over-The-Air (OTA) software updates, ensuring the system remains current and performs optimally.

6. TROUBLESHOOTING

6.1. No Power

- Check all power connections to ensure they are securely plugged in.

- Verify the vehicle's fuse for the car radio is not blown.
- Ensure the vehicle battery is adequately charged.

6.2. No Sound

- Check volume settings on the unit and ensure it is not muted.
- Verify speaker connections are correct and secure.
- Ensure the correct audio source is selected.

6.3. GPS Not Working

- Ensure the GPS antenna is properly connected and positioned with a clear view of the sky.
- Check GPS settings within the unit to ensure GPS is enabled.
- If using online maps, verify 5G WiFi connectivity.

6.4. CarPlay/Android Auto Connection Issues

- For wireless connections, ensure Bluetooth and WiFi are enabled on your phone and the car radio.
- For wired connections, try a different USB cable.
- Restart both your phone and the car radio unit.
