VECELO Bunk Bed Twin Over Full

VECELO Twin Over Full Metal Bunk Bed Instruction Manual

Model: Bunk Bed Twin Over Full

Brand: VECELO

IMPORTANT SAFETY INFORMATION

WARNING: Failure to follow these warnings and instructions could result in serious injury or death.

- Always assemble the bunk bed strictly according to the provided instructions to prevent tipping and ensure structural integrity.
- Exercise caution when using the upper bunk to avoid falls. Ensure the user is capable of safely ascending and descending the ladder.
- The upper bunk is equipped with 15-inch high guardrails. These guardrails must always be in place to prevent accidental falls.
- The maximum weight capacity for the upper bunk is **400 lbs.**
- The maximum weight capacity for the lower bunk is **600 lbs.**
- Only use mattresses that comply with the recommended thickness to ensure guardrail effectiveness. Recommended mattress thickness: 8"-10".
- Periodically check all connections and hardware to ensure they remain tight and secure.
- Do not allow more than one person on the upper bunk at any time.
- Do not attach or hang items on any part of the bunk bed that are not designed for use with the bed; for example, but not limited to, hooks, belts, or jump ropes.

PRODUCT OVERVIEW

The VECELO Twin Over Full Metal Bunk Bed is designed to maximize room space while providing comfortable sleeping arrangements. This bunk bed features a durable metal frame, a twin-sized upper bunk, and a full-sized lower bunk, making it suitable for various users.

Key Features:

- **Dual-Size Design:** Accommodates both twin and full-size mattresses.
- **Sturdy Metal Construction:** Crafted from heavy-duty metal with 22 strong slats for reliable support.
- **Enhanced Safety:** Features a 15-inch full-length guardrail on the upper bunk and an angled ladder for safe access.
- **Noise-Free Design:** Incorporates custom plastic buckles and mute clips to secure slats and prevent noise.
- **Space-Saving:** Provides generous under-bed space for storage.
- **No Box Spring Needed:** Designed for direct mattress placement on slats.

PACKAGE CONTENTS

Before beginning assembly, please verify that all components listed below are present and undamaged. If any parts are missing or damaged, do not proceed with assembly. Contact customer service for assistance.

- 1 x VECELO Twin Over Full Bunk Bed Frame (all metal components)
- 1 x Assembly Instruction Manual
- 1 x Assembly Kit (includes all necessary screws, bolts, and tools)

SETUP INSTRUCTIONS

Please read all instructions carefully before assembly. It is recommended that two adults assemble this bunk bed. Ensure you have ample space and all parts are accounted for before starting.

Step 1: Prepare the Area and Unpack

Clear a spacious area for assembly. Unpack all components and lay them out on a soft, clean surface to prevent scratches. Identify all parts using the provided parts list in your assembly kit.

Step 2: Assemble the Lower Bed Frame

Begin by connecting the side rails to the headboard and footboard of the lower full-size bed. Secure all connections loosely with the provided hardware. Do not fully tighten until the entire frame is assembled.

Image: Overall dimensions and weight limits for the VECELO Twin Over Full Bunk Bed. Upper bunk capacity: 400 lbs, Lower bunk capacity: 600 lbs. Dimensions are 78"L x 55"W x 60"H.

Step 3: Attach Slats to the Lower Bed

Place the full-size bed slats onto the lower bed frame. Ensure the plastic buckles and mute clips are properly engaged to secure the slats and prevent noise. Tighten all screws for the lower bed frame once slats are in place.

Image: Detail of the noise-free slat system with plastic buckles for secure and silent mattress support.

Step 4: Assemble the Upper Bed Frame

Repeat the process for the twin-size upper bed frame, connecting the side rails to its headboard and footboard. Secure loosely at this stage.

Step 5: Attach Slats to the Upper Bed

Install the twin-size bed slats onto the upper bed frame, ensuring proper engagement of the plastic buckles and mute clips. Tighten all screws for the upper bed frame.

Step 6: Connect Upper and Lower Beds

Carefully lift the assembled upper bed frame and align it with the connection points on the lower bed frame. Secure these connections with the designated hardware. Ensure all bolts are tightened securely at this stage.

Step 7: Install the Angled Ladder

Attach the angled ladder to the designated hooks or connection points on the bunk bed. Ensure it is firmly secured and stable for safe climbing.

Image: The angled ladder, designed for easy and secure access to the upper bunk.

Step 8: Install Safety Device (Anti-Tipping)

For enhanced stability, fix the provided anti-tipping safety device to the wall and the bunk bed. Follow the specific instructions in your assembly kit for proper installation. This step is crucial for preventing accidental tipping.

Image: Top shows the safety device for wall attachment to enhance bunk bed stability. Bottom shows the ample under-bed storage space.

Step 9: Final Inspection

Once assembly is complete, double-check all bolts, screws, and connections to ensure they are fully tightened. Confirm the guardrails are securely in place and the ladder is stable. The bunk bed is now ready for use.

OPERATING INSTRUCTIONS

- **Weight Limits:** Do not exceed the maximum weight capacity of **400 lbs** for the upper bunk and **600 lbs** for the lower bunk.
- **Mattress Usage:** Use only standard twin-size mattresses for the upper bunk and standard full-size mattresses for the lower bunk. The recommended mattress thickness is 8-10 inches to ensure the effectiveness of the guardrails. No box spring is required.
- **Ladder Use:** Always use the angled ladder for ascending and descending the upper bunk. Ensure the ladder is stable before use.
- **Guardrails:** The upper bunk guardrails must always be in place. Do not remove them.
- **General Use:** Avoid rough play on or around the bunk bed. Do not jump on the bed.

MAINTENANCE

- **Cleaning:** To clean the metal frame, wipe with a damp cloth and then dry thoroughly with a dry cloth. Avoid using harsh chemicals or abrasive cleaners, which can damage the finish.
- **Hardware Check:** Periodically (e.g., every 3-6 months) inspect all bolts, screws, and connections to ensure they are tight. Re-tighten any loose hardware to maintain stability and safety.
- **Structural Integrity:** Regularly check the bed frame for any signs of damage, bending, or wear. If any damage is observed, discontinue use and contact customer service.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed feels wobbly or unstable.	Loose hardware connections. Anti-tipping device not installed or improperly secured.	Ensure all bolts and screws are fully tightened. Verify the anti-tipping device is correctly installed and anchored to the wall.
Slats do not fit or are difficult to install.	Frame components are too tight or misaligned.	Loosen the screws on the main frame components slightly, then insert the slats. Once all slats are in place, re-tighten all frame screws.
Screws do not align with holes during assembly.	Components are not correctly oriented or are forced.	Do not force screws. Ensure all parts are oriented correctly according to the instruction manual. Loosen adjacent connections to allow for slight adjustment, then try again.
Squeaking noises during use.	Loose connections or improperly seated slats.	Check and tighten all hardware. Ensure all plastic buckles and mute clips on the slats are properly engaged.

SPECIFICATIONS
