

Airefina AF-A09

Airefina Single Size Airbed

Model: AF-A09 | Brand: Airefina

1. IMPORTANT SAFETY INSTRUCTIONS

Please read and understand all safety instructions before using this product. Failure to follow these instructions may result in injury or product damage.

- **Do not allow children or pets to sleep unattended on the airbed.**
- **Avoid excessive weight and over-inflation.** Maintain appropriate pressure during inflation to prevent damage to the airbed seams.
- The built-in electric pump operates on **AC100V power**. For outdoor use, a generator or portable power source is required.
- Keep the airbed away from sharp objects, heat sources, and open flames.
- Do not use the airbed as a flotation device.

2. SETUP AND INFLATION

Setting up your Airefina airbed is quick and easy thanks to the integrated electric pump.

1. **Unpack:** Remove the airbed from its storage bag and unroll it on a clean, flat surface. Ensure the area is free of sharp objects.
2. **Connect Power:** Plug the airbed's power cord into a standard AC100V electrical outlet.
3. **Inflate:** Locate the built-in electric pump dial. Turn the dial to the 'Inflate' position. The pump will begin to inflate the airbed.
4. **Monitor Inflation:** The airbed will typically inflate in approximately 4 minutes. Observe the airbed as it inflates.
5. **Adjust Firmness:** Once inflated, you can adjust the firmness to your preference by allowing a small amount of air to escape or by adding more air. Turn the dial to the 'Off' position when the desired firmness is reached.

電動ポンプ搭載ですぐに本格的なベッドが完成

空気の出し入れは、スイッチひとつで簡単。
体調や気分に合わせて、硬さを調整できます。

3. OPERATION

The Airefina airbed is designed for comfortable and stable sleep.

- **Comfortable Sleep Design:** The airbed features 21 columnar air coils that connect the top and bottom surfaces, ensuring stability and even distribution of body pressure for comfortable sleep.
- **Velour-like Surface:** The flocked surface provides a soft and gentle touch, feeling less cold against the skin, which helps maintain warmth on chilly days.
- **Stability:** A special design on the bed edges enhances stability, allowing for confident movement and turning over during sleep.
- **Deflation:** To deflate, turn the pump dial to the 'Deflate' position. The pump will automatically remove air from the airbed. Once fully deflated, turn the dial to 'Off' and unplug the power cord.

4. MAINTENANCE

Proper care and maintenance will extend the life of your Airefina airbed.

4.1 Cleaning

- The bottom and side materials are made of durable, waterproof polyvinyl chloride, making them easy to clean.

- Wipe the surface with a damp cloth and mild soap. Do not use harsh chemicals or abrasive cleaners.
- Ensure the airbed is completely dry before storing to prevent mold or mildew.

4.2 Storage

- After deflating completely, fold the airbed compactly.
- Store the airbed in its included storage bag to protect it from dust and damage.
- Keep the airbed in a cool, dry place, away from direct sunlight and extreme temperatures.

5. TROUBLESHOOTING

If you encounter issues with your Airefina airbed, refer to the following common problems and solutions:

- **Airbed loses firmness:** It is normal for airbeds to lose a small amount of air over time due to temperature changes or stretching of the material. Simply re-inflate to your desired firmness. If significant air loss occurs rapidly, check for punctures.
- **Pump not working:** Ensure the power cord is securely plugged into a working AC100V outlet. Check if the dial is correctly set to 'Inflate' or 'Deflate'. If the pump overheats during prolonged use, it may automatically shut off. Allow it to cool down before attempting to use it again.
- **Punctures or leaks:** Avoid over-inflating the airbed, as this can weaken welded seams and lead to leaks. If a puncture occurs, a repair kit (not included) may be used to patch small holes.

6. SPECIFICATIONS

Model Number	AF-A09
Brand	Airefina
Dimensions (L x W x H)	190 cm x 99 cm x 45.7 cm
Material	Polyvinyl Chloride (PVC)

Color	Gray
Weight Capacity	295 kg
Product Weight	5.2 kg
Power Source	AC100V (Built-in Electric Pump)
Features	Flocked surface, Built-in electric pump, Anti-slip bottom

広々としたスペースと寝返りも安心なデザイン

縁に特別な加工を施しているのので、安心して眠りにつくことができます。
