Sanag B60S

Sanag B60S Bone Conduction Sports Headphones Instruction Manual

Model: B60S

INTRODUCTION

Thank you for choosing the Sanag B60S Bone Conduction Sports Headphones. These headphones are designed to provide a comfortable and safe audio experience, especially during sports and water activities. This manual provides essential information on how to set up, operate, maintain, and troubleshoot your device.

Open Ear Design Enjoy Your Music Anytime

Even in swimming or showering

PACKAGE CONTENTS

- Sanag B60S Bone Conduction Sports Headphones
- Charging Cable
- User Manual

SETUP

1. Initial Charging

Before first use, fully charge the headphones. Connect the magnetic charging cable to the charging port on the headphones and the other end to a USB power adapter (not included). The charging indicator will show the charging status. A full charge typically takes approximately 2 hours.

10 Hours Battery Life

Perfect for long-distance sports

2. Power On/Off

- **Power On:** Long press the Power button for 3 seconds.
- **Power Off:** Long press the Power button for 3 seconds.

3. Bluetooth Pairing

When powered on for the first time, the headphones will automatically enter Bluetooth pairing mode. The indicator light will flash, indicating it is ready to pair.

1. Ensure the headphones are powered on.
2. On your device (smartphone, tablet, etc.), enable Bluetooth.
3. Search for available devices and select "Sanag B60S" from the list.
4. Once connected, the indicator light will stop flashing.

MAGNETIC Quick charge

Image: Graphic highlighting Bluetooth 5.3 for high-speed and stable transmission.

4. MP3 Mode and File Transfer (64GB Internal Storage)

The Sanag B60S features 64GB of built-in storage for MP3 playback, ideal for use where Bluetooth connectivity is limited or unavailable, such as underwater.

- **File Transfer:** Connect the headphones to your computer using the charging cable. The headphones will appear as a removable drive. Drag and drop your audio files (MP3 format recommended) directly into the drive.
- **Switching to MP3 Mode:** While the headphones are on, double-tap the middle button (Power/Multi-function button) to switch between Bluetooth mode and MP3 mode.

Leak-Free Private Listening

With the driver's decoupled design ensuring independent functionality, your audio remains private

- **Activate Voice Assistant (Siri/Google Assistant):** Long press the Volume + button for 1 second.
- **Switch to MP3 Mode:** Double press the Power/Multi-function button.

Wearing the Headphones

Position the bone conduction transducers on your cheekbones, just in front of your ears. The band should rest comfortably around the back of your head. This open-ear design allows you to hear your surroundings while enjoying audio.

Safety & Audio

Enjoy music while hearing your surroundings

MAINTENANCE

Waterproof Design (IPX8)

The Sanag B60S headphones are IPX8 waterproof, meaning they can be submerged in water up to 2 meters deep for up to two hours. This makes them suitable for swimming and other water sports.

- **For Swimming:** Always switch to MP3 mode when using the headphones underwater, as Bluetooth signals do not transmit effectively through water.
- **After Water Exposure:** After use in water, gently wipe the headphones dry with a soft cloth. Ensure the charging port is completely dry before connecting the charging cable.

Bluetooth & MP3 Modes, Free Listening

No Memory Card & Bluetooth Mode

Only Support Bluetooth Connection to Play Music,
Can not Enjoy Music Underwater

With 64GB Memory Card Bluetooth Mode & MP3 Mode

Support Bluetooth Connection and MP3 Mode at the Same
Time, Can Switch MP3 Mode Underwater, Can Listen to
Beautiful Songs While Swimming

Image: Graphic comparing IPX5 (low waterproof rating, not suitable for swimming) with IPX8 (high waterproof rating, perfect for swimming, use MP3 mode in water).

Cleaning and Storage

- Clean the headphones with a soft, damp cloth. Do not use harsh chemicals or abrasive materials.
- Store the headphones in a cool, dry place away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Headphones do not power on.	Low battery.	Charge the headphones for at least 2 hours.
No sound or low volume.	Volume too low, not paired, incorrect mode.	Increase volume on headphones and connected device. Ensure proper Bluetooth pairing or switch to MP3 mode if using internal storage.
Cannot pair with device.	Headphones not in pairing mode, device Bluetooth off, interference.	Ensure headphones are powered on and in pairing mode (flashing indicator). Turn Bluetooth off and on on your device. Move closer to the device.
Sound quality is poor.	Improper placement, bone conduction characteristics.	Adjust the placement of the transducers on your cheekbones for optimal sound. Bone conduction technology naturally differs from in-ear audio.
MP3 files not playing.	Incorrect file format, not in MP3 mode.	Ensure audio files are in MP3 format. Double-tap the Power/Multi-function button to switch to MP3 mode.
