## HONBAY WS010-MidG

# HONBAY Sectional Sleeper Sofa with Pull-Out Bed and Storage Chaise Instruction Manual

Model: WS010-MidG | Brand: HONBAY

## INTRODUCTION

---

This manual provides detailed instructions for the assembly, operation, and maintenance of your HONBAY Sectional Sleeper Sofa with Pull-Out Bed and Storage Chaise. Please read all instructions carefully before beginning assembly and retain this manual for future reference. This sofa is designed for comfort and versatility, featuring a convertible sleeper function and integrated storage.

## SAFETY INFORMATION

---

- Ensure all components are securely fastened before use.
- Do not exceed the maximum weight capacity of 400 lbs per seat. The overall weight limit is 2100 lbs.
- Keep small parts away from children during assembly to prevent choking hazards.
- Avoid standing or jumping on the sofa.
- Use caution when operating the pull-out bed mechanism to prevent pinching.

## PACKAGE CONTENTS

---

Your HONBAY Sectional Sleeper Sofa is shipped in multiple packages, typically 5 modules. Verify all parts are present before assembly. The package includes all necessary hardware for installation.

- Sofa Modules (5 pieces)
- Seat Cushions
- Back Cushions
- Legs
- Assembly Hardware (bolts, washers, Allen wrench)

## SETUP AND ASSEMBLY INSTRUCTIONS

---

Assembly typically requires two adults and can be completed in approximately 30 minutes. No additional tools are needed beyond what is provided.

### **Step 1: Unpack Components**

Carefully remove all parts from their packaging. Lay them out on a clean, soft surface to prevent damage. Identify each module and component.

### **Step 2: Attach Legs**

For each sofa module, locate the pre-drilled holes on the underside. Attach the legs using the provided bolts and Allen wrench. Ensure all legs are tightened securely.

### **Step 3: Connect Sofa Modules**

Arrange the sofa modules in your desired U-shaped configuration. Each module features snap-design connectors on its sides. Align the connectors of adjacent modules and push them firmly together until they click into place. It may be helpful to have a second person assist in aligning the brackets.

#### **Step 4: Place Cushions**

Place the seat and back cushions onto the assembled sofa frame. The back cushions may have Velcro strips to secure them to the frame.

### **OPERATING INSTRUCTIONS**

---

#### **Using the Pull-Out Bed**

To convert the sofa into a bed, locate the handle or strap on the front of the pull-out section. Gently pull the mechanism outwards. The bed frame will extend, and the mattress section will unfold. To retract, push the bed frame back into the sofa until it locks into place.

### **Accessing the Storage Chaise**

The chaise section of the sofa features a hidden storage compartment. To access it, lift the seat cushion of the chaise. The lid will open, revealing the storage space beneath. Close the lid securely after use.

## CARE AND MAINTENANCE

---

- **Cleaning:** For general cleaning, vacuum the sofa regularly using an upholstery attachment. For spills, blot immediately with a clean, dry cloth. For stubborn stains, consult a professional upholstery cleaner or use a mild fabric cleaner according to its instructions. Test any cleaning solution on an inconspicuous area first.
- **Cushion Care:** Rotate and fluff cushions periodically to maintain their shape and extend their lifespan.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause fabric fading. Position your sofa away from direct sunlight or use curtains/blinds.
- **Frame Care:** The solid wood frame requires no special maintenance. Ensure all connections remain tight over time.

## TROUBLESHOOTING

---

Problem	Possible Cause	Solution
Sofa modules not connecting securely.	Connectors not properly aligned or fully engaged.	Ensure the snap-design connectors are perfectly aligned. Apply firm, even pressure until a click is heard. Check for any obstructions.
Pull-out bed is stiff or difficult to operate.	Mechanism may need lubrication or there might be an obstruction.	Check for any items obstructing the mechanism. If still stiff, a silicone-based lubricant can be applied to the moving parts (avoid oil-based lubricants).
Cushions feel too firm.	New foam cushions often require a break-in period.	Continue to use the sofa regularly. Cushions will soften over time with use. Fluffing them can also help.
