4.1 General Assembly

This shelving unit features a boltless design for easy assembly. No screws or bolts are required. The components interlock securely.

1. **Prepare the Area:** Clear a spacious, flat, and clean area for assembly.
2. **Assemble the Uprights:** Connect the steel uprights and crossbars to form the basic frame structure. Ensure all connections are fully engaged and secure.
3. **Install Reinforcement Bars:** For each shelf level, insert the two reinforcement bars into the designated slots on the crossbars. These bars provide additional support for the plywood shelves.
4. **Place Plywood Shelves:** Carefully place the plywood boards onto the assembled frame, resting them on the crossbars and reinforcement bars. Ensure they sit flush and are stable.
5. **Repeat for All Tiers:** Continue assembling the frame and placing shelves for all five tiers.
