4.2. Inserting a Memory Card

The Jumbao G6 requires a TF (microSD) memory card (1GB-128GB) to store photos and videos. The memory card is not included in the package.

1. Locate the microSD card slot on the side of the camera.
2. Gently insert the TF card into the slot until it clicks into place. Ensure the card is inserted in the correct orientation.
3. To remove, gently push the card inward until it springs out.

4.3. Setting Date and Time

To ensure your photos and videos have the correct timestamp, set the date and time:

1. Connect the camera to your computer using the USB-C cable.
2. The camera display should show a menu with "Storage mode" and "Camera". Select "Storage mode".
3. On your computer, navigate to the camera's storage. Look for a folder or file related to time setting (e.g., "update_time" or "timeset.txt").
4. Follow the instructions within the file (if any) or use a provided utility to synchronize the camera's time with your computer's.
5. Once updated, safely eject the camera from your computer and disconnect the cable.
6. Turn the camera off and then on again to apply the new settings.
