## 6. MAINTENANCE

---

- **Cleaning:** Wipe down metal surfaces with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish. For MDF surfaces, use a mild cleaner and dry immediately.
- **Hardware Check:** Periodically (e.g., every 3-6 months) inspect all bolts, screws, and connections. Tighten any loose hardware to maintain stability and safety.
- **Slide Inspection:** Ensure the slide surface is clean and free of debris. Check for any signs of wear or damage.
- **Avoid Overloading:** Do not place excessive weight on the desk or shelves beyond their intended capacity.

## 7. TROUBLESHOOTING

---

- **Wobbling/Instability:** If the bed feels wobbly, re-check all connections. Ensure all bolts and screws are securely tightened. Uneven flooring can also contribute; consider using furniture pads to level the bed.

- **Squeaking Noises:** Squeaking often indicates loose hardware. Identify the source of the noise and tighten the corresponding bolts. Applying a small amount of lubricant (e.g., silicone spray) to metal-on-metal contact points can also help.
- **Missing Parts:** If you find any parts missing during assembly, contact SOFTSEA customer support immediately with your product model number and a description of the missing part.
- **Difficulty Assembling:** Review the assembly manual carefully. Ensure you are using the correct hardware for each step. If issues persist, contact customer support.
