## 1. SAFETY INFORMATION

- **Weight Capacity:** Do not exceed the maximum weight capacity of 800 lbs for the mattress and sleepers combined. Exceeding this limit may cause structural damage and injury.
- **Secure Assembly:** Ensure all screws and bolts are securely tightened during assembly. Regularly check all connections for stability and re-tighten as necessary.
- **Sharp Edges:** Exercise caution around all components during assembly to avoid injury from sharp edges.
- **Children and Pets:** Keep small parts and packaging materials away from children and pets to prevent choking hazards.
- **Level Surface:** Assemble and use the bed frame on a flat, level surface to ensure stability.

### 3. ASSEMBLY INSTRUCTIONS

---

Assembly is designed to be straightforward. It is recommended to have two people for easier and safer assembly. Please follow the steps carefully.

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Lay them out on a clean, soft surface (like a rug or blanket) to prevent scratches. Identify each part according to the package contents list.
2. **Attach Side Rails to Headboard:** Connect the side rails to the headboard using the provided bolts and Allen wrench. Do not fully tighten the bolts until all major components are assembled.
3. **Attach Side Rails to Footboard:** Connect the other end of the side rails to the footboard using the provided bolts. Again, do not fully tighten yet.
4. **Install Center Support Beam:** Secure the center support beam to the designated brackets on the headboard and footboard. Ensure it is properly aligned.
5. **Attach Bed Legs:** Screw the bed legs into the pre-drilled holes on the frame. Ensure they are tightened securely.
6. **Install Wooden Slats:** The wooden slats are designed with a Velcro system for easy and secure placement. Lay the slat rolls across the frame, aligning the Velcro strips on the slats with those on the side rails. Press down firmly to secure. The EVA mute foam on the slats helps prevent noise.
7. **Final Tightening:** Once all components are in place and aligned, go back and fully tighten all bolts and screws using the Allen wrench. Ensure the frame is sturdy and stable.
8. **Place Mattress:** Carefully place your King-sized mattress onto the assembled slat system. No box spring is needed for this platform bed.

## 4. OPERATING INSTRUCTIONS

The GAOMON King Bed Frame is designed for standard King-sized mattresses. No box spring is required due to the robust wooden slat support system.

- **Mattress Placement:** Ensure your mattress is centered and evenly distributed on the wooden slats.
- **Weight Distribution:** Avoid concentrating heavy loads on a single point of the bed frame. Distribute weight evenly.

## 5. MAINTENANCE

Regular maintenance will help prolong the life and appearance of your bed frame.

- **Cleaning:** For the corduroy upholstered headboard and frame, gently vacuum with an upholstery attachment to remove dust. For spills, blot immediately with a clean, dry cloth. For stubborn stains, consult a professional upholstery cleaner. Do not use harsh chemicals.
- **Hardware Check:** Periodically (e.g., every 3-6 months) check all bolts and screws to ensure they remain tight. Re-tighten if any looseness is detected to maintain stability and prevent noise.
- **Under-Bed Cleaning:** The design allows for easy cleaning underneath the bed frame. Use a vacuum or mop as needed.

Image: The bed frame's design provides sufficient clearance underneath, making it easy to clean with a robotic vacuum or other cleaning tools.

## 6. TROUBLESHOOTING

If you encounter any issues with your bed frame, refer to the following common solutions:

- **Squeaking or Noise:**

- Ensure all bolts and screws are fully tightened. Loose connections are a common cause of noise.
  - Verify that the wooden slats are properly seated and the Velcro strips are securely attached to the frame. The EVA mute foam is designed to reduce noise.
  - Check if the bed frame is on a level surface. Uneven floors can cause stress on the frame, leading to noise.
- **Instability/Wobbling:**
    - Re-check all connections and tighten any loose hardware.
    - Ensure all bed legs are firmly attached and making full contact with the floor.
    - Confirm that the center support beam is correctly installed and secured.
  - **Parts Missing or Damaged:** If you discover any missing or damaged parts upon opening the package, do not proceed with assembly. Contact customer support immediately for assistance.
