uwant B400 Portable Carpet Cleaner with Steam & Hot Water: Instruction Manual

Model: B400

PRODUCT OVERVIEW

The uwant B400 is a portable carpet and upholstery cleaner designed for deep cleaning with both steam and hot water capabilities. It features strong suction and a convenient 2-in-1 water tank system for efficient and easy use across various surfaces.

SETUP

Before first use, ensure all components are present and undamaged. The cleaner is designed for quick assembly.

- Unpack Components:** Remove the main unit, hose, cleaning heads, and solution from the packaging.
- Attach Hose:** Securely connect the flexible hose to the main unit's designated port.
- Select Cleaning Head:** Choose the appropriate cleaning head for your task (e.g., wide brush for carpets, narrow for crevices, or steam brush for specific steam cleaning). Attach it firmly to the end of the hose.
- Fill Water Tank:** The 2-in-1 water tank integrates both clean and dirty water compartments. Remove the tank, open the clean water cap, and fill with water (up to 1.2 liters). Add 1 ounce of uwant Textile Cleaning Solution per 34 ounces of water. Securely close the cap and reinsert the tank into the unit.

Figure 1: The 2-in-1 water tank allows for easy filling and emptying in one step.

OPERATING INSTRUCTIONS

The uwant B400 offers both hot water and steam cleaning modes for versatile stain removal.

- Power On:** Plug the unit into a power outlet. Press the power button on the main unit.
- Select Mode:** On the handle, press the hot water button once for hot water mode (149°F). Press the

steam button twice for steam mode (212°F). Allow approximately 35 seconds for the unit to heat up for steam.

3. **Apply Cleaner:** For stubborn stains, apply cleaning solution directly to the stain before activating the machine.
4. **Clean Surface:** Press the trigger on the cleaning head to dispense water or steam. Move the cleaning head slowly over the stained area, scrubbing as needed. The powerful 18Kpa suction will extract the dirty water into the waste compartment of the 2-in-1 tank.

MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your cleaner.

1. **Empty and Clean Water Tank:** After each use, remove the 2-in-1 water tank. Empty the dirty water from its compartment and rinse both compartments thoroughly with clean water. Allow to air dry before reassembling.
2. **Self-Cleaning Hose:** The unit includes self-cleaning accessories. Attach the self-cleaning tool to the hose nozzle and run clean water through the system to flush out any residue from the hose.
3. **Clean Attachments:** Detach and rinse all cleaning heads and brushes under running water. Remove any trapped debris or hair.

Figure 4: The self-cleaning hose feature helps maintain hygiene and prevents clogs.

TROUBLESHOOTING

If you encounter issues, refer to the following common solutions:

- **No Suction:** Check if the 2-in-1 water tank is correctly seated. Ensure the dirty water compartment is not full. Verify the hose and cleaning head are securely attached and free from blockages.
- **No Water/Steam Dispensing:** Ensure the clean water tank is filled and properly installed. Check if the selected mode (hot water or steam) has completed its heating cycle (indicated by the light). Verify the trigger on the cleaning head is fully pressed.
- **Unit Not Turning On:** Confirm the power cord is securely plugged into a working outlet. Press the main power button firmly.
- **Poor Cleaning Results:** Ensure you are using the recommended uwant Textile Cleaning Solution. Pre-treat stubborn stains. Use the appropriate cleaning head and apply consistent, slow passes over the area.

SPECIFICATIONS

- **Brand:** uwant
- **Model Name:** B400
- **Color:** Grey
- **Item Weight:** 4.83 Pounds
- **Product Dimensions:** 12.2"D x 6.3"W x 11.61"H
- **Capacity:** 1.2 Liters (2-in-1 Water Tank)
- **Suction Power:** 18Kpa
- **Steam Mode Temperature:** Up to 212°F
- **Hot Water Mode Temperature:** Up to 149°F
