

Vipbear OPT08

Vipbear Smart Toilet Bidet Instruction Manual

MODEL: OPT08

Brand: Vipbear

INTRODUCTION

This manual provides comprehensive instructions for the Vipbear Smart Toilet Bidet, Model OPT08. It covers essential information for safe installation, efficient operation, and proper maintenance of your smart toilet. Key features include a foot sensor flush, a comfortable heated seat, various cleaning modes, and a dedicated child mode. Please read this manual thoroughly before installation and use to ensure optimal performance and longevity of your product.

Important Note: This non-tank smart toilet requires a minimum household water pressure of 1.5 MPa (equivalent to filling a 5L container in 15 seconds) for consistent, powerful flushing. Low water pressure may result in incomplete waste removal.

IMPORTANT SAFETY INFORMATION

- Ensure proper grounding for electrical connections.
- Do not immerse the product in water or spray water directly onto electrical components.
- Keep children away from the toilet during operation, unless using the dedicated child mode.
- Disconnect power before performing any maintenance or cleaning.
- Do not use abrasive cleaners or harsh chemicals on the toilet surface.

PACKAGE CONTENTS

Verify that all components are present before beginning installation:

- Smart Toilet Unit
- Remote Control
- Flange Ring
- Water Valve
- Power Outage Flushing Battery
- Instruction Manual (this document)

- Installation Hardware

PRODUCT OVERVIEW

The Vipbear Smart Toilet Bidet combines modern design with advanced functionality for an enhanced bathroom experience.

Video 1: Installation Guide for Vipbear Smart Toilet OPT08. This video demonstrates the steps involved in setting up your smart toilet, including connecting water lines and securing the unit.

Figure 5: Product Dimensions and Quick Installation Components. Refer to this diagram for precise measurements and to identify all parts for installation.

Pre-Installation Checklist:

- Confirm minimum water pressure of 1.5 MPa.
- Ensure a grounded electrical outlet is available near the installation site.
- Verify rough-in dimensions match your bathroom setup (refer to Figure 5).

Basic Installation Steps:

1. Prepare the floor flange and ensure the area is clean.
2. Connect the water supply line to the toilet unit.
3. Carefully place the toilet over the flange and secure it.
4. Connect the power cord to a grounded outlet.
5. Test for leaks and proper flushing.

OPERATING INSTRUCTIONS

Flushing Modes:

The Vipbear Smart Toilet offers multiple convenient flushing options:

- **Remote Flush:** Use the provided remote control to activate flushing.
- **Side Button Flush:** A button located on the side of the toilet provides manual flushing.
- **Off-Seat Auto Flush:** The toilet automatically flushes a small amount of water when you stand up

from the seat.

- **Foot-Sensor Flush:** Gently tap your foot near the designated sensor area at the base of the toilet to activate flushing.

Video 2: Demonstration of the Foot Sensor Flush feature. This video illustrates how to activate the hands-free foot sensor flush.

Versatile Cleaning Modes:

Utilize the remote control to select your preferred cleaning function:

- **Rear Wash:** Provides a thorough posterior cleansing.
- **Female Wash:** Offers a gentle and targeted wash for feminine hygiene.
- **Automatic Cleaning:** A pre-programmed cleaning cycle.
- **Atomized Cleaning:** A fine mist spray for a softer cleansing experience.

Heated Seat and Warm Air Dryer:

The heated seat provides comfort, especially in colder environments. Adjust the temperature using the remote control to one of the following settings: Normal Temperature, 93°F, 99°F, or 104°F. After washing, the warm air dryer gently dries, enhancing comfort.

Video 3: Smart Toilet with Heated Seat and Remote Control. This video demonstrates the heated seat function and how to operate various features using the remote control.

Child Mode:

Activate the dedicated child mode for a gentle and comfortable experience for younger users. This mode adjusts water pressure and temperature to suit children, aiding in independent toilet use and potty training.

Night Light and Soft-Close Features:

The gentle night light illuminates the bowl, providing visibility without disrupting sleep. The quiet soft-close lid and seat prevent slamming, ensuring a peaceful environment.

Figure 6: Night Light and Soft-Close Lid/Seat for minimal disruption.

MAINTENANCE

Self-Cleaning Nozzle:

The spray rod is designed for easy cleaning and self-maintenance. The nozzle performs a self-cleaning cycle before and after each use to ensure hygiene.

General Cleaning:

- Regularly wipe down the exterior surfaces with a soft, damp cloth and mild, non-abrasive cleaner.
- Do not use harsh chemicals, abrasive pads, or solvents, as these can damage the finish.
- For thorough cleaning, disconnect the power supply.

TROUBLESHOOTING

- **Incomplete Flushing:** Ensure your household water pressure meets the minimum requirement of 1.5 MPa. Check for any obstructions in the water supply line.
- **No Power:** Verify the power cord is securely plugged into a grounded outlet. Check your circuit breaker.
- **Power Outage:** A built-in backup battery ensures flushing functionality even when the main power is out.
- **Remote Control Not Responding:** Check the remote control batteries and ensure there are no obstructions between the remote and the toilet unit.
