Assembly Steps:

1. **Unpacking:** Carefully remove all components from the packaging.
2. **Handlebar Installation:** Insert the handlebar stem into the fork tube. Ensure the handlebar is straight and tighten the stem bolt securely.

3. **Front Basket Attachment:** Attach the front basket to the handlebars using the provided straps or clips.

5. **Seat Post Adjustment:** Insert the seat post into the frame. Adjust the seat height to ensure the rider's feet can touch the ground comfortably when seated. Secure the quick-release lever or bolt.
6. **Training Wheels (Optional):** If using, attach the training wheels to the rear axle. Ensure they are at an appropriate height to provide stability without preventing the rear wheel from making contact with the ground.
7. **Final Checks:** Before the first ride, double-check all bolts, nuts, and quick-release levers for tightness. Ensure brakes are functional and tires are properly inflated.
