### **Step 5: Finalize Assembly and Check Stability**

Once both sections are connected, gently place the desk in its desired location. Check all screws and fasteners to ensure they are tight. The desk should be stable and level. Adjust leveling feet if present.

## 5. OPERATING INSTRUCTIONS

### Rotating the Desk Sections

The unique design of this desk allows the storage shelf unit to rotate 360 degrees relative to the main desktop. This feature enables you to adjust the desk's shape to fit different room layouts or functional needs.

- **Clear the Surface:** Before rotating, remove any items from the desk surfaces, especially those near the pivot point, to prevent them from falling or being damaged.
- **Grasp Both Sections:** Place one hand firmly on the main desktop section and the other hand on the rotating shelf unit.
- **Gently Rotate:** Apply gentle, even pressure to rotate the shelf unit to your desired position. The mechanism is designed for smooth movement.
- **Secure Position:** Once in the desired position (e.g., compact L-shape, extended L-shape, or straight line), ensure the desk is stable before placing items back on it.

## 6. MAINTENANCE

Proper care will extend the life and appearance of your desk.

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals, as they can damage the laminated finish.
- **Spills:** Clean up spills immediately with a dry cloth to prevent moisture damage.
- **Heat Protection:** Use coasters or protective pads under hot items to prevent heat marks.
- **Sunlight Exposure:** Avoid prolonged direct sunlight exposure, which can cause fading or discoloration.
- **Hardware Check:** Periodically check all assembly hardware (screws, bolts) and tighten if necessary to maintain stability.

## 7. TROUBLESHOOTING

---

If you encounter issues with your desk, refer to the following common solutions:

- **Desk is Wobbly:**
  - Ensure all screws and fasteners are securely tightened.
  - Verify the desk is placed on a level surface. Adjust leveling feet if available.
  - Check that all panels are correctly aligned and fully seated.
- **Difficulty Rotating Sections:**
  - Ensure no objects are obstructing the rotation path.
  - Check the rotating mechanism for any loose or overtightened fasteners. It should be firm but allow movement.
  - Apply a small amount of silicone-based lubricant to the pivot point if movement is stiff (avoid oil-based lubricants on wood).
- **Missing or Damaged Parts:**
