Bellemave LSH-001-TFB

Bellemave Twin Over Full Bunk Bed Instruction Manual

Model: LSH-001-TFB

IMPORTANT SAFETY INFORMATION

Please read and understand all instructions before assembling and using this bunk bed. Failure to follow these instructions may result in serious injury.

- Do not load more than **250 pounds** on the upper bed.
- Do not load more than **400 pounds** on the bottom bed.
- Use the ladder carefully to avoid injury. Always face the ladder when ascending or descending.
- Be cautious around sharp edges during assembly and use.
- Ensure all connections are securely tightened before use and periodically check for tightness.
- Only use mattresses that comply with the recommended thickness: **6 inches for the upper bed** and **8 inches for the bottom bed**.
- The top bunk is not suitable for children under 6 years of age.
- Always use the guardrails on the upper bunk.

PRODUCT OVERVIEW

The Bellemave Twin Over Full Bunk Bed is designed for space-saving and durability. It features a metal frame with full-length guardrails and integrated ladders for safe access. The design includes noise-reducing elements and under-bed storage clearance.

SETUP AND ASSEMBLY

Basic assembly is required. It is recommended to have at least two adults for assembly. Lay out all parts and hardware before beginning. A rubber mallet, a set of metric T hex wrenches (5mm), and WD-40 for sticker residue removal may be helpful.

1. **Unpack and Identify Parts:** Carefully unpack all components and verify against the parts list (not provided in this manual, refer to your product packaging). Ensure no parts are missing or damaged.
2. **Prepare Assembly Area:** Assemble the bunk bed in the room where it will be used, ensuring ample space. The assembled unit may not fit through standard doorways.
3. **Assemble Base Frames:** Begin by assembling the base frames for both the twin and full beds. Attach all bolts hand-tight initially to allow for adjustments.
4. **Attach Support Legs and Slats:** Securely attach all support legs and install the metal slats into the frames. Ensure plastic stoppers are used to reduce noise.
5. **Connect Upper and Lower Sections:** Carefully lift and connect the upper twin bed frame to the lower full bed frame. This step requires at least two people.

6. **Install Ladders and Guardrails:** Attach the integrated ladders to both ends of the bunk bed. Install all full-length guardrails on the upper bunk.
7. **Final Tightening:** Once all parts are in place and aligned, firmly tighten all bolts. Do not overtighten to avoid damaging the metal tubing.

OPERATING INSTRUCTIONS

- **Weight Capacity:** Adhere strictly to the weight limits: 250 lbs for the upper bed and 400 lbs for the bottom bed.
- **Ladder Use:** Always use the integrated ladders for accessing the upper bunk. Do not jump onto or off the bunk bed.
- **Mattress Placement:** Ensure mattresses are properly seated within the bed frame and do not exceed the recommended thickness to maintain guardrail effectiveness.
- **Guardrails:** The upper bunk is equipped with full-length guardrails. Ensure they are always in place and secure.
- **Under-Bed Storage:** Utilize the 9.8-inch clearance beneath the bottom bed for storage. Do not overload this area to prevent damage to the bed frame.

MAINTENANCE

- **Regular Inspection:** Periodically check all bolts and connections to ensure they remain tight. Retighten as necessary.
- **Cleaning:** Wipe the metal frame with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Noise Reduction:** If squeaking occurs, check the plastic stoppers on the slats and ensure all bolts are tight.
- **Environmental Conditions:** Avoid exposing the bed to extreme humidity or direct sunlight for prolonged periods to preserve the material integrity.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed feels wobbly or unstable.	Loose bolts or uneven floor.	Ensure all bolts are securely tightened. Check if the bed is on a level surface; use shims if necessary.
Squeaking noises during use.	Loose connections or missing plastic stoppers on slats.	Retighten all bolts. Verify that all plastic stoppers are correctly installed on the metal slats.
Difficulty aligning parts during assembly.	Bolts overtightened prematurely or incorrect orientation of parts.	Loosen all bolts, re-check part orientation against the manual, and then re-tighten hand-tight before final tightening.

SPECIFICATIONS

Model Number: LSH-001-TFB

Brand: Bellemave

Size: Twin over Full

Material: Metal

Product Dimensions (L x W x H): 77.6" x 56.7" x 64.6"

Upper Bed Weight Capacity: 250 lbs

Bottom Bed Weight Capacity: 400 lbs

Recommended Upper Mattress Thickness: 6 inches

Recommended Bottom Mattress Thickness: 8 inches

Under-Bed Clearance: 9.8 inches

Included Components: Guardrails, Slats, Ladders

Assembly Required: Yes
