2. Safety Information

Your safety is paramount. Please adhere to the following guidelines:

- **Assembly Caution:** Be cautious when assembling and moving the bed frame to avoid potential injuries.
- **Movement:** When moving the assembled bed frame, use care around the middle lower bed leg and all four corners. Lift the frame evenly to prevent damage or injury.
- **Weight Capacity:** Do not exceed the maximum weight recommendation of 800 pounds. Overloading can compromise the frame's integrity and lead to injury.
- **Stable Surface:** Ensure the bed frame is placed on a flat, stable, and level surface to prevent wobbling or instability.

- **Regular Inspection:** Periodically check all connections and fasteners to ensure they remain tight. Retighten if necessary.

3. Setup and Assembly

This bed frame is designed for tool-free assembly, making the process straightforward and quick.

3.1 Package Contents

All necessary components are thoughtfully packed. Please verify all parts are present before beginning assembly. Refer to the included installation manual for a detailed parts list.

3.2 Assembly Instructions

1. Unpack all components and lay them out on a clean, soft surface to prevent scratches.
2. Follow the step-by-step instructions provided in the included installation manual. The design allows for straightforward assembly without screws or additional tools.
3. Connect the frame sections using the quick-lock mechanism. Ensure each connection is securely engaged.
4. Attach the support legs to the frame.
5. Once assembled, ensure all parts are firmly connected and the frame is stable before placing a mattress on it.

4. Operating Instructions

The GarveeHome bed frame is designed for optimal mattress support and comfort without the need for a box spring.

4.1 Mattress Placement

Place your mattress directly onto the heavy-duty iron slat system. The slats are engineered with ideal spacing to provide consistent, robust support for innerspring, hybrid, latex, and memory foam mattresses. This design enhances mattress durability and improves airflow.

4.2 Headboard Attachment

The frame features pre-drilled holes for simple headboard attachment. Align your headboard with these holes and secure it using appropriate hardware (headboard and hardware not included).

4.3 Mattress Stability

Six integrated non-slip grippers are designed to keep the mattress securely in place, preventing it from sliding during use.

4.4 Under-Bed Storage

The 6-inch height of the bed frame provides a modest clearance for under-bed storage, allowing for efficient use of space.

5. Maintenance

Proper maintenance will extend the life and performance of your bed frame.

- **Cleaning:** Wipe the metal frame with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners, which can damage the finish.
- **Inspection:** Periodically (e.g., every 3-6 months) inspect all connections, bolts, and slats to ensure they are secure. Tighten any loose components.
- **Movement:** If you need to move the bed frame, lift it rather than dragging it to prevent damage to the frame or your flooring. Ensure the mattress is removed before moving.
- **Floor Protection:** The integrated non-slip grippers also serve as floor protectors. Ensure they are intact and clean to prevent scratches on your flooring.

6. Troubleshooting

If you encounter any issues with your bed frame, refer to the following common solutions:

- **Squeaking/Noise:**
  - Ensure all connections are tightly secured.
  - Verify the mattress is properly seated on the slats and not rubbing against the frame.
  - Check that the bed frame is on a level surface.
- **Mattress Sliding:**
  - Confirm the six non-slip grippers are correctly positioned and making contact with the mattress.
  - Ensure the mattress size is compatible with the full-size frame.
- **Instability/Wobbling:**
  - Re-check all assembly connections for tightness.
  - Ensure the bed frame is on a completely flat and even floor.
  - Verify that no components are bent or damaged.
