LDGSUPH Compatible with Coway AP-1007EH, AP-1007AH, AP-1007GH, AP-0807DH

LDGSUPH Air Purifier Filter Instruction Manual

For Coway Models AP-1007EH, AP-1007AH, AP-1007GH, AP-0807DH

1. Product Overview

This document provides instructions for the LDGSUPH replacement air purifier filter, designed for use with specific Coway air purifier models. This filter is engineered to capture airborne particles and improve indoor air quality.
The filter system typically consists of a multi-layer design, including a HEPA filter and an activated carbon filter, to address various air contaminants.

2. Compatibility

This LDGSUPH replacement filter is compatible with the following Coway Air Purifier Models:

- Coway AP-1007EH
- Coway AP-1007AH
- Coway AP-1007GH
- Coway AP-0807DH

Ensure your air purifier model matches one of the listed models for proper fit and function.

3. Features

- **Multi-Layer Filtration:** Designed with a progressive multi-layer structure to effectively capture fine airborne particles, contributing to cleaner indoor air.
- **Eco-Friendly Materials:** Constructed using recyclable materials, emphasizing sustainability throughout the product's lifecycle.
- **Quiet Operation:** Engineered to minimize airflow noise, allowing for efficient air purification without significant disturbance to your environment.
- **Pre-Cleaned and Ready to Use:** The filter is cleaned and prepared before packaging, allowing for direct installation and immediate use without prior cleaning.

4. Installation Instructions

Follow these steps to replace the air purifier filter. Always refer to your specific Coway air purifier's user manual for detailed instructions on opening the unit and accessing the filter compartment.

1. **Step 1: Power Off and Unplug**

   Before beginning, ensure your Coway air purifier is turned off and unplugged from the power outlet to prevent electrical hazards.

2. **Step 2: Locate Filter Compartment**

   Open the front cover or access panel of your air purifier. The filter compartment is typically located behind this panel.

3. **Step 3: Remove Old Filters**

   Carefully remove the used filters from the air purifier. This may include a pre-filter, an activated carbon filter, and a HEPA filter. Note the orientation of each filter as you remove it.

Image: Two distinct air purifier filters, illustrating the HEPA filter (white pleated) and the activated carbon filter (black honeycomb structure).

4. **Step 4: Install New Filters**

   Insert the new LDGSUPH filters into the compartment. Ensure the filters are placed in the correct order and orientation as indicated by your air purifier's manual or the markings on the filters themselves. The activated carbon filter typically goes in first, followed by the HEPA filter.

Image: Front view of the pleated HEPA filter, designed to capture fine particles.

5. **Step 5: Close Cover and Power On**

   Close the front cover or access panel securely. Plug the air purifier back into the power outlet and turn it on. Reset the filter indicator light if your model has one, following your air purifier's instructions.

5. Maintenance

Regular filter replacement is crucial for maintaining optimal air purifier performance and air quality.

- **Filter Lifespan:** The lifespan of air purifier filters varies depending on usage, air quality, and environmental factors. Generally, HEPA filters should be replaced every 12 months, and activated carbon filters every 6-12 months. Refer to your Coway air purifier's manual for specific recommendations.
- **Pre-Filter Cleaning:** If your air purifier uses a washable pre-filter, clean it regularly (e.g., every 2-4 weeks) to extend the life of the main filters.
- **Indicator Lights:** Pay attention to your air purifier's filter replacement indicator lights, if available.

6. Troubleshooting

If you encounter issues after replacing the filter, consider the following:

- **Reduced Airflow:** Ensure the filters are installed correctly and not obstructed. Check if the air purifier's intake and output vents are clear.
- **Unusual Odors:** New filters may emit a slight odor initially, which should dissipate quickly. If strong or persistent odors occur, re-check filter installation.
- **Filter Indicator Light Remains On:** After replacing filters, you may need to manually reset the filter indicator light on your air purifier. Consult your air purifier's manual for instructions on resetting the filter life monitor.
- **Air Purifier Not Turning On:** Verify the unit is properly plugged in and the power outlet is functional. Ensure all covers and panels are securely closed, as some units have safety interlocks.

7. Specifications

Attribute	Detail
Brand	LDGSUPH
Compatibility	Coway AP-1007EH, AP-1007AH, AP-1007GH, AP-0807DH
Filter Type	HEPA and Activated Carbon (multi-layer)
Model Number (Manufacturer's)	LFY10
