

Delumu Android Tracker

Delumu Android Tracker Tags - Instruction Manual

Model: Android Tracker

1. INTRODUCTION

This manual provides detailed instructions for the setup, operation, and maintenance of your Delumu Android Tracker Tags. These smart tags are designed to help you locate your valuable items using the Google Find Hub app on compatible Android devices.

Each package contains 4 smart tags, 4 lanyards, and 2 replaceable CR2032 button cell batteries.

2. PACKAGE CONTENTS

- 4 x Delumu Android Tracker Tags
- 4 x Lanyards
- 2 x CR2032 Button Cell Batteries (additional batteries included for replacement)

Figure 2.1: Package Contents. Includes 4 smart tags, 4 lanyards, and 2 button cell batteries.

3. SETUP AND PAIRING

Follow these steps to set up and pair your Delumu Android Tracker Tags with your Android device:

1. Step 1: Power On

Press the power button on the tracker tag once. The device will enter pairing mode.

2. Step 2: Connect via Google Find Hub App

Ensure Bluetooth is enabled on your Android phone. The connection page should automatically pop up on your phone. Click "Connect".

3. Step 3: Open App

Click "Open app" to launch the Google Find Hub application.

4. Step 4: Complete Connection

The connection is complete, and your tracker is ready to use. You can change the device name and category within the app.

4. OPERATING INSTRUCTIONS

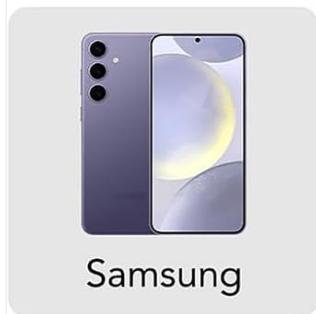

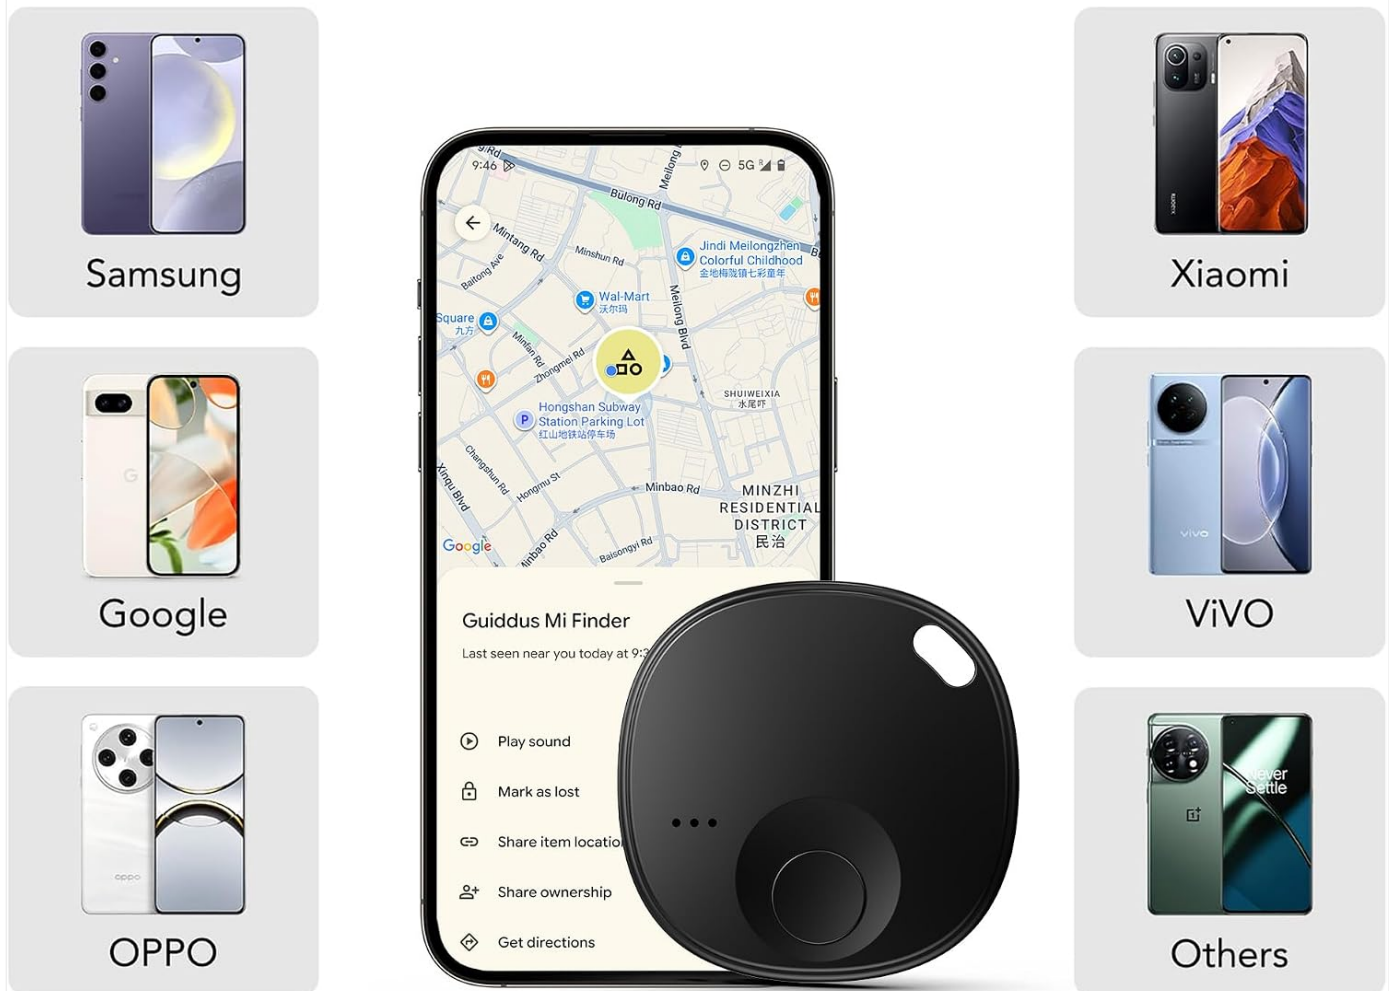

4.1 Finding Items Nearby (Bluetooth Range)

When your smart tracker is within Bluetooth range (approximately 80 meters / 260 feet), you can use the Google Find Hub app to trigger a loud sound from the tracker. This helps you quickly locate items that are hidden or out of sight.

1. Open the Google Find Hub app.
2. Select the tracker you wish to locate.
3. Tap the "Play sound" option. The tracker will emit a 90-100dB sound.

Supports most **Android** phones

Note: This feature is not supported on Apple and Huawei devices.

4.2 Finding Items Remotely (Lost Mode)

If your item is out of Bluetooth range, you can use the Google Find Hub app's Lost Mode feature to locate it. This feature leverages the Google Find Hub network.

1. Open the Google Find Hub app.
2. Select the lost tracker.
3. Mark the item as "Lost" in the app.
4. The Google Find Hub network will anonymously relay the tracker's location when other Android devices come within its range. You will receive location updates in your app.

Find remotely

When an object falls in the distance, the latest position and route of the object can be seen through a mobile phone.

4.3 Sharing Tracker Location

The "Sharing Mode" allows you to share the location of your trackers with family and friends. This is useful for shared items or for family trips.

1. In the Google Find Hub app, select the tracker you wish to share.
2. Choose the "Share item location" or "Share ownership" option.
3. Follow the in-app instructions to invite family or friends to view the tracker's location.
4. You can customize the name and icon for each device for easy identification.

4.4 Attaching the Tracker

The compact design of the Delumu Android Tracker Tags allows them to be attached to various items:

- Attach to keys using the included lanyard.
- Place inside wallets or bags.
- Secure to backpacks or luggage.
- Can also be used for drones or other personal items.

5. MAINTENANCE

5.1 Battery Replacement

The Delumu Android Tracker Tags use replaceable CR2032 button cell batteries, offering up to 365 days of battery life. When the battery is depleted, replace it as follows:

1. Carefully open the back cover of the tracker tag.
2. Remove the old CR2032 battery.
3. Insert a new CR2032 battery, ensuring correct polarity.
4. Close the back cover securely.

Two spare CR2032 batteries are included in the package.

6. TROUBLESHOOTING

6.1 Connection Issues

If you encounter a situation where you cannot connect the tracker to your Android phone, try resetting the tracker:

1. Quickly press the power button four times.
2. Then, hold down the button continuously until you hear a sound when you press it the fifth time.
3. After resetting, please try reconnecting the tracker to your phone.

6.2 Tracker Not Responding

- Check the battery level in the Google Find Hub app. If low, replace the battery.
- Ensure your phone's Bluetooth is enabled and the tracker is within range.
- Perform a reset as described in section 6.1.

6.3 Water Exposure

While the trackers are designed for everyday use, they are not fully waterproof. Avoid prolonged exposure to water or submersion, as this may damage the device.
