## SWZEC 1812

# SWZEC Model 1812 Non-Slip Waterproof Winter Barefoot Shoe User Manual

Model: 1812 | Brand: SWZEC

## INTRODUCTION

This manual provides essential information for the proper use, care, and maintenance of your SWZEC Model 1812 Non-Slip Waterproof Winter Barefoot Shoes. Please read these instructions carefully before first use to ensure optimal performance and longevity of your footwear.

## SETUP

Your SWZEC barefoot shoes are designed for immediate use. No complex assembly is required. Follow these simple steps for initial preparation:

1. **Unpacking:** Carefully remove the shoes from their packaging. Inspect them for any visible damage or manufacturing defects.
2. **Initial Fit Check:** Try on both shoes to ensure a comfortable fit. Barefoot shoes are designed to allow natural foot movement, so ensure there is adequate space for your toes to splay.
3. **Lacing/Closure Adjustment:** If applicable, adjust any buckles or pull-on features to secure the shoe comfortably around your ankle. The Model 1812 features a buckle and pull-on closure.

## OPERATING (WEARING INSTRUCTIONS)

The SWZEC Model 1812 shoes are designed for winter conditions, offering non-slip and waterproof features for outdoor activities. To maximize comfort and performance:

- **Proper Footwear:** Wear appropriate socks for the weather conditions. While the shoes offer warmth, socks can enhance

comfort and moisture management.

- **Secure Fit:** Ensure the shoes are snug but not tight. The buckle and pull-on design should provide a secure fit around the ankle without restricting movement.
- **Walking Naturally:** Barefoot shoes encourage a natural gait. Allow your feet to move freely and adapt to the ground.
- **Waterproof Feature:** While designed to be waterproof, avoid prolonged submersion in deep water to maintain the integrity of the materials.
- **Non-Slip Sole:** The rubber sole provides enhanced grip on various surfaces. Exercise caution on extremely slippery or icy terrain.

## MAINTENANCE

---

Proper care will extend the life and appearance of your SWZEC Model 1812 shoes. The outer material is Suede and Rubber, with a Fleece inner lining.

- **Cleaning Suede:** For dirt and dust, use a soft brush specifically designed for suede. For tougher stains, a suede eraser can be used. Avoid excessive water.
- **Cleaning Rubber Sole:** Wipe the rubber sole with a damp cloth to remove mud and debris. A mild soap solution can be used for stubborn dirt.
- **Drying:** If the shoes become wet, allow them to air dry naturally at room temperature. Do not use direct heat sources like radiators or hair dryers, as this can damage the materials.
- **Storage:** Store shoes in a cool, dry place away from direct sunlight. Using shoe trees can help maintain their shape.
- **Water Resistance:** While the shoes are designed to be waterproof, regular application of a suede protector spray can enhance their water resistance and protect the material.

## TROUBLESHOOTING

Here are solutions to common issues you might encounter:

- **Uncomfortable Fit:** Ensure you have selected the correct size. Barefoot shoes should feel roomy in the toe box. If discomfort persists, check for proper sock thickness or consult a sizing guide.
- **Reduced Grip:** Clean the rubber soles thoroughly to remove any embedded dirt or debris that might be affecting traction.
- **Water Penetration:** While waterproof, extreme conditions or damage to the material can lead to water penetration. Inspect for tears or worn areas. Reapply a waterproofing spray if needed.
- **Odor:** Allow shoes to air out after each use. If odor persists, use shoe deodorizers or baking soda. Ensure shoes are completely dry before storage.

SPECIFICATIONS
