- **Dusting:** Gently dust the model regularly with a soft, dry cloth or a soft brush to prevent dust buildup in intricate areas.
- **Avoid Moisture:** Keep the model away from water, high humidity, and damp environments, as wood can warp or swell.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause the wood to fade or dry out,

potentially leading to cracks.

- **Temperature Control:** Store the model in a stable room temperature environment. Extreme temperature fluctuations can affect the wood.

## TROUBLESHOOTING

---

If you encounter any issues during assembly or with your finished model, consider the following:

- **Missing or Damaged Parts:** Double-check all sheets and packaging. If a part is genuinely missing or damaged, please contact ROBOTIME customer support with details of the missing part number and your purchase information.
- **Difficulty Fitting Pieces:** Ensure you are using the correct pieces for the step. Check the orientation of the pieces as per the instruction manual. Sometimes, a slight rotation or gentle, even pressure is needed for a snug fit. Do not force pieces together, as this can cause breakage.
