

Sutaig BMF201

Sutaig Milk Frother BMF201 Instruction Manual

Model: BMF201

INTRODUCTION

Thank you for choosing the Sutaig Milk Frother BMF201. This appliance is designed to create various milk foams and warm milk for your favorite beverages, including cappuccinos, lattes, hot chocolate, and more. Please read this manual thoroughly before first use to ensure safe and optimal operation.

IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons, including the following:

- Read all instructions before using the appliance.
- Do not immerse the base unit in water or other liquids. Only the stainless steel pitcher is detachable and washable.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner.
- Close supervision is necessary when any appliance is used by or near children.
- Avoid contact with moving parts.
- Do not use attachments not recommended or sold by the manufacturer.
- Do not use outdoors.
- Do not let the cord hang over the edge of a table or counter, or touch hot surfaces.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- Always attach plug to appliance first, then plug cord into the wall outlet. To disconnect, turn any control to "off", then remove plug from wall outlet.
- Do not use appliance for other than intended household use.
- Exercise extreme caution when disposing of hot steam.
- The appliance has an automatic shut-off feature when the pitcher is lifted from the base.

PRODUCT OVERVIEW

The Sutaig Milk Frother BMF201 is designed for versatility and ease of use, offering multiple functions for various milk preparations.

Image: The Sutaig Milk Frother BMF201 displayed with examples of beverages it can create, including hot cappuccino, hot latte, hot milk/chocolate, cold/hot thick foam, and cold/hot fluffy foam.

Key Features:

- **Customizable Foam Texture:** Choose between Dense Foam for cappuccinos or Airy Foam for lattes.

- **27oz (800ml) Family-Sized Capacity:** Large jug for heating, 12oz (350ml) for frothing.
- **Dual-Temperature Milk Heating:** Settings for 110°F (gentle warm-up) or 150°F (extra-hot).
- **Quiet Operation:** Features a whisper-quiet motor.
- **Dishwasher Safe Pitcher:** Food-grade 304 stainless steel pitcher is detachable and dishwasher safe.
- **Versatile 4-in-1 Design:** One-touch controls for Hot Dense Foam, Hot Airy Foam, Heated Milk, and Cold Foam.
- **Automatic Keep-Warm Function:** 30-minute keep-warm function.

SETUP

1. **Unpack:** Carefully remove all components from the packaging. Retain packaging for future storage or transport.
2. **Initial Cleaning:** Before first use, wash the stainless steel pitcher and lid with warm, soapy water. Rinse thoroughly and dry. Wipe the base unit with a damp cloth.
3. **Assemble:** Place the frothing whisk inside the pitcher. Ensure it is securely seated on the magnetic drive. Place the pitcher onto the base unit.
4. **Placement:** Position the frother on a stable, flat, heat-resistant surface away from water sources.
5. **Power Connection:** Plug the power cord into a standard electrical outlet.

OPERATION

The Sutaig Milk Frother BMF201 offers various modes for different milk preparations. Always ensure the frothing whisk is correctly installed for frothing functions.

Filling the Pitcher:

- For frothing (Hot Dense Foam, Hot Airy Foam, Cold Foam): Do not exceed the lower "MAX" line (12oz/350ml) to prevent overflow.
- For heating milk without frothing: Do not exceed the upper "MAX" line (27oz/800ml).
- Always use cold milk for best frothing results.

27oz Large Capacity

Share foam Joy with your family and friends

The image shows three women sitting on a couch, smiling and holding mugs of coffee. In front of them is a round black table with a Sutaig milk frother, two small bowls, and a plate of cookies. The frother is a silver and white electric device with a control knob and buttons. The background is a simple grey wall.

Selecting a Mode:

The frother features a control knob and buttons for different functions:

1. **Hot Dense Foam:** Press the appropriate button for rich, thick foam, ideal for cappuccinos.
2. **Hot Airy Foam:** Select this option for light, fluffy foam, perfect for lattes.
3. **Heated Milk:** Use this setting to warm milk without frothing. You can choose between 110°F or 150°F.

4. **Cold Foam:** For cold beverages, select this option to create cold, dense foam.

Once a mode is selected, the frother will begin operation and automatically shut off when the cycle is complete. The 30-minute keep-warm function will activate for heated milk.

MAINTENANCE AND CLEANING

Regular cleaning ensures the longevity and hygiene of your Sutaig Milk Frother BMF201.

1. **Unplug:** Always unplug the appliance from the power outlet before cleaning.
2. **Detachable Pitcher:** The stainless steel pitcher is fully detachable from the base unit and is dishwasher safe. For manual cleaning, wash with warm, soapy water and a non-abrasive sponge. Rinse thoroughly.
3. **Lid and Whisk:** The lid and frothing whisk can be washed by hand with warm, soapy water.
4. **Base Unit:** Wipe the exterior of the base unit with a soft, damp cloth. Do not immerse the base unit in water or any other liquid.
5. **Drying:** Ensure all parts are completely dry before reassembling or storing the frother.

being rinsed by hand with water.

TROUBLESHOOTING

If you encounter issues with your Sutaig Milk Frother BMF201, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Frother does not turn on.	Not plugged in; pitcher not correctly seated; power outage.	Ensure the power cord is securely plugged in. Check if the pitcher is properly placed on the base. Verify power supply.
Milk is not frothing or foam is insufficient.	Incorrect milk type; milk level too high/low; whisk not installed.	Use cold, fresh milk (dairy or barista-style plant-based milk often work best). Ensure milk is between MIN and MAX frothing lines. Check if the frothing whisk is correctly inserted.
Milk is not heating.	Heating element issue; incorrect mode selected.	Ensure the correct heating mode is selected. If the problem persists, contact customer support.
Burning smell or scorched milk.	Milk level too low; residue from previous use.	Ensure milk level is above the MIN line. Clean the pitcher thoroughly after each use to prevent residue buildup. The frother has an anti-scorch design, but proper cleaning is essential.

If these solutions do not resolve the issue, please contact Sutaig customer support for further assistance.
