MAINTENANCE AND CLEANING

Regular maintenance ensures the longevity and optimal performance of your coffee machine.

1. Automatic Cleaning Programs

- The machine features automatic rinsing and cleaning cycles. Follow the prompts on the display.
- Regularly empty and clean the drip tray and coffee grounds container.

2. Removable Brew Group

- Switch off the machine and unplug it.
- Open the service door and carefully remove the brew group.
- Rinse the brew group thoroughly under lukewarm running water. Do not use detergents.

- Allow it to air dry completely before reinserting.

3. Descaling

- The machine will indicate when descaling is required.
- Use a suitable descaling solution specifically designed for coffee machines.
- Follow the instructions provided with the descaling agent and the machine's display prompts.

4. Water Filter Replacement

- Replace the water filter regularly as indicated by the machine or every two months, whichever comes first.
- Refer to the water filter packaging for specific replacement instructions.

TROUBLESHOOTING

If you encounter issues with your KKT KOLBE Barista Pure, please refer to the following common solutions. For more detailed troubleshooting, consult the comprehensive manual included with your product.
