6. Troubleshooting

If you encounter any issues with your dresser, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Dresser is wobbly or unstable.	Loose fasteners; uneven floor.	Ensure all screws are tightened. Check if the floor is level; use furniture pads if needed. Verify anti-tip kit is securely installed.
Drawers do not slide smoothly.	Drawer slides misaligned; debris in slides; drawer overloaded.	Remove the drawer and check slide alignment. Clean any debris from the slides. Reduce the weight in the drawer.
Drawer does not close completely.	Obstruction; drawer contents blocking closure; misaligned slides.	Check for items obstructing the drawer. Ensure drawer contents are not overfilling. Re-check drawer slide installation.
