1. INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your SIXTOP 4G+64G Android Car Stereo. This unit is designed for Mitsubishi Outlander models from 2008 to 2015, offering advanced features such as Wireless CarPlay, Android Auto, GPS navigation, Bluetooth 5.0, FM/RDS radio, and a high-definition touchscreen display. Please read this manual thoroughly before installation and use to ensure proper functionality and safety.

For Mitsubishi Outlander 2008-2015

A: Low Configuration

B: High Configuration

2. SETUP AND INSTALLATION

2.1. Vehicle Compatibility

This car stereo is specifically designed for Mitsubishi Outlander, Citroen C-Crosser, and Peugeot 4007 models manufactured between 2008 and 2015. It is compatible with left-hand drive vehicles and includes a CANBUS system. Please note that this head unit is only suitable for vehicles with an original radio that has a small screen. Confirm your original radio configuration before proceeding with the installation.

2.2. Package Contents

Verify that all components are present in the package:

- Android Car Stereo Unit (1)
- Backup Camera (1)
- Power Cable
- USB Cable (2)
- GPS Antenna
- Rear Camera Input Cable
- Original USB Cable
- RCA Cable
- User Manual
- Microphone
- Installation Tool

Packing List & Size

265mm/10.4inch

275mm/10.8inch

235mm/9.2inch

- 1.Power Cable
- 2.RCA Input/Output
- 3.Reversing Camera Input
- 4.USB Cable
- 5.GPS Antenna
- 6.Radio Antenna

Image: A comprehensive view of all items included in the product package, such as the head unit, cables, and accessories.

2.3. Wiring Diagram

Refer to the diagram below for proper connection of the cables to the head unit. Ensure all connections are secure before powering on the device.

1. Power Cable: Connects to the vehicle's power supply.
2. RCA Input/Output: For external audio/video devices.
3. Reversing Camera Input: Connects to the included backup camera.
4. USB Cable: For data transfer and device charging.
5. GPS Antenna: For satellite navigation signal reception.
6. Radio Antenna: For FM/RDS radio reception.

3.2. Wireless CarPlay and Android Auto

Connect your smartphone wirelessly via WiFi or Bluetooth to access CarPlay (for iOS) or Android Auto (for Android). This allows for voice control and integration with your phone's contacts, GPS navigation, music, video, and messaging applications directly on the car stereo display.

Image: Display of the Wireless CarPlay interface, illustrating access to navigation, music, and communication features via voice commands.

Image: Display of the Wireless Android Auto interface, showing navigation, music playback, and hands-free calling capabilities.

3.3. Mirror Link Function

The Mirror Link feature allows you to sync your Android or iOS phone's screen directly to the car stereo display. This function supports both wireless and wired connections, enabling you to view your phone's content on the larger screen.

Image: Visual representation of the Mirror Link feature, demonstrating how a smartphone's display is duplicated on the car stereo screen.

3.4. Audio Equalizer (EQ) and AI Voice Control

The built-in 32-band EQ system allows for precise adjustment of various sound effects, optimizing your in-car audio experience. Additionally, the unit supports AI Intelligent Voice Control. Activate the voice assistant by clicking the Voice App and issuing commands for hands-free operation. (Note: AI Voice Robot App activation code may need to be purchased separately).

EQ Adjustment

Altering the sound balance and shape the tone, improve clarity in the car.

Image: Screenshot of the car stereo's EQ adjustment interface, displaying options for fine-tuning audio frequencies and sound profiles.

3.5. GPS Navigation

The car stereo includes GPS navigation capabilities, supporting both online and offline maps. Connect to WiFi for real-time traffic updates and online map services, or use pre-downloaded offline maps for navigation without an internet connection.

GPS Navigation

Image: The car stereo screen displaying a GPS navigation map with an active route and directional information.

3.6. Connectivity (WiFi, Bluetooth 5.0, FM/RDS)

- **WiFi Connection:** Connect the car radio to your phone's hotspot or a local WiFi network to access online functions, stream videos or music, and download applications.

Image: The car stereo screen demonstrating various online applications and content accessible through a WiFi connection.

- **Bluetooth 5.0:** The upgraded Bluetooth 5.0 ensures a stable signal for hands-free calling, wireless audio streaming, and automatic phone book download.

Image: The car stereo's Bluetooth interface, showing call functions and music playback, emphasizing safe, hands-free operation.

- **FM/RDS Radio:** Enjoy your favorite radio stations with the built-in FM/RDS tuner, which includes 18 preset stations. Stay updated with music, news, and weather broadcasts.

Image: The car stereo's FM/RDS radio interface, displaying frequency tuning and preset stations, set against a backdrop of people enjoying music.

3.7. AHD Backup Camera

The included AHD backup camera provides a clear reversing image. When the rear gear is engaged, the 9-inch touchscreen automatically switches to the camera view, enhancing parking safety.

3.8. Steering Wheel Control (SWC)

The unit supports steering wheel control functions, allowing you to easily adjust the radio's volume, switch channels, and manage calls directly from your steering wheel buttons. This feature enhances convenience and safety while driving.

Image: A steering wheel with integrated control buttons, and the car stereo display showing the interface for programming steering wheel controls.

3.9. Split Screen and UI Themes

The split-screen function allows you to run two applications simultaneously on the display. Drag a browse page to the left or right side of the screen to activate. Both screens can be operated independently. The Android auto radio also offers multiple UI themes for personalization.

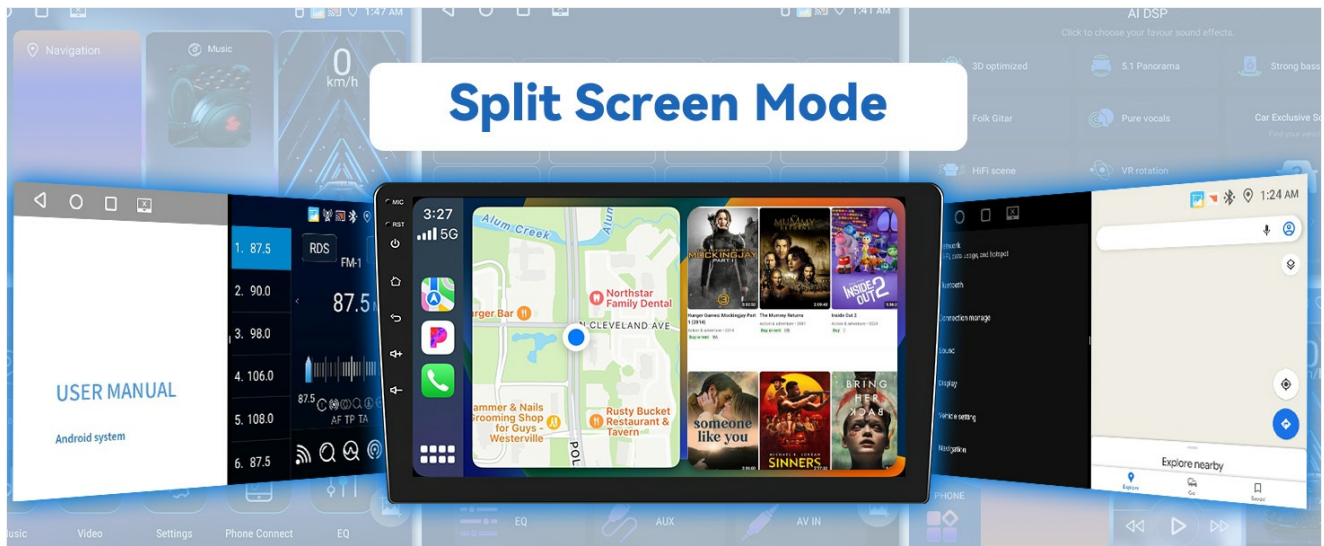

Image: The car stereo screen demonstrating the split-screen mode, allowing two applications to be viewed and operated concurrently.

4. CARE AND MAINTENANCE

To ensure the longevity and optimal performance of your car stereo, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the screen and exterior. Avoid abrasive cleaners or solvents that could damage the display or finish.
- **Software Updates:** Periodically check for available software updates to ensure your system has the latest features and performance enhancements. Updates can typically be found on the manufacturer's website or through the device's settings when connected to Wi-Fi.
- **Temperature:** Avoid exposing the unit to extreme temperatures, both hot and cold, for extended periods.
- **Power Supply:** Ensure the vehicle's electrical system is in good condition to prevent power fluctuations that could affect the stereo.

5. TROUBLESHOOTING

If you encounter issues with your car stereo, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No Power	Loose power connection, blown fuse.	Check power cables and vehicle fuses. Ensure proper wiring.
No Sound	Volume too low, incorrect audio source, loose speaker wires.	Increase volume, select correct audio input, check speaker connections.
GPS Signal Lost/Inaccurate	GPS antenna obstructed or improperly installed.	Ensure GPS antenna has a clear view of the sky and is securely connected.
Bluetooth Pairing Issues	Device not in pairing mode, interference, incorrect password.	Ensure both devices are in pairing mode, clear previous pairings, try again.
Touchscreen Unresponsive	Temporary software glitch.	Restart the unit. If issue persists, contact support.
