

## SKY LINE OCEAN CB1435

# SKY LINE OCEAN Cherry Blossom Tree Building Set (Model CB1435) Instruction Manual

Japanese Sakura House Architecture with LED Lights

## INTRODUCTION

---

Thank you for choosing the SKY LINE OCEAN Cherry Blossom Tree Building Set. This set allows you to construct a detailed Japanese Sakura House, complete with a cherry blossom tree, micro bonsai elements, and integrated LED lighting. Comprising 1435 precision-crafted pieces, this model offers an engaging and rewarding building experience, culminating in a beautiful decorative piece.

This manual provides essential information for assembly, operation of the LED lights, maintenance, and troubleshooting to ensure you enjoy your building set to its fullest.

## SETUP AND ASSEMBLY

---

The SKY LINE OCEAN Cherry Blossom Tree Building Set contains 1435 small interlocking building blocks. Patience and organization are key to a successful assembly.

### 1. Unpacking and Preparation

- Carefully open the packaging and remove all contents.
- Verify that all bags of building blocks and the instruction booklet are present.
- Prepare a clean, well-lit, and spacious work surface.
- Due to the small size of the pieces, it is highly recommended to sort the blocks by color and shape into separate containers before beginning assembly. This will significantly aid in locating pieces during construction.

Image: Sorting and initial assembly of the building blocks.

## 2. Assembly Process

- Follow the step-by-step instructions provided in the included manual. Each step illustrates the required pieces and their placement.
- Pay close attention to the orientation of each block to ensure a secure and correct fit.
- The blocks are designed to interlock firmly. Apply gentle, even pressure to connect them.
- If a piece does not fit easily, double-check the instruction manual to ensure you are using the correct piece and orientation. Do not force pieces together, as this may cause damage.
- The set includes micro-sized blocks. Handle them carefully to avoid misplacement.

### 3. LED Light Integration

The LED lighting system is integrated during the assembly process. Follow the specific steps in the instruction manual for wiring and placement of the LED streamer lights. The power source for the LED lights is an internal, non-replaceable battery/capacitor.

## OPERATING THE LED LIGHTS

Your SKY LINE OCEAN Cherry Blossom Tree Building Set features an integrated LED lighting system to enhance its visual appeal.

### 1. Powering On/Off

- Locate the small battery box or switch integrated into the model, as indicated in your assembly manual.
- Toggle the switch to the 'ON' position to illuminate the LED lights.
- Toggle the switch to the 'OFF' position to turn off the LED lights.

### 2. Battery Information

- The LED lights are powered by an internal, non-replaceable battery/capacitor.
- The lifespan of the battery is designed to last for an extended period under normal use.
- No user intervention is required for battery replacement.

## MAINTENANCE

---

Proper care will help preserve the appearance and integrity of your building set.

### 1. Cleaning

- To remove dust, use a soft, dry brush or a can of compressed air.
- For more stubborn dirt, gently wipe the blocks with a slightly damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the plastic.
- Ensure the model is completely dry before displaying or storing.

### 2. Storage

- Store the assembled model in a cool, dry place away from direct sunlight to prevent discoloration or

warping of the plastic.

- If disassembling for storage, keep all pieces in sealed bags or containers to prevent loss.

## **TROUBLESHOOTING**

---

If you encounter any issues during or after assembly, please refer to the following common solutions:

### **1. Missing Pieces**

- Thoroughly check your work area and packaging. Small pieces can easily be overlooked.
- If you believe a piece is genuinely missing, contact customer support with details of the missing part (as identified in the instruction manual).

### **2. LED Lights Not Working**

- Ensure the power switch is in the 'ON' position.
- Check all wire connections to ensure they are securely plugged in according to the assembly instructions.
- Since the battery is internal and non-replaceable, if the lights still do not function after checking connections, please contact customer support.

### **3. Loose Connections / Model Instability**

- Review the assembly steps for the affected section. Ensure all blocks are pressed firmly together.
- Sometimes, a misplaced block can affect the stability of subsequent sections. Carefully backtrack and verify previous steps.

## **SPECIFICATIONS**
