AWESAFE B0GHVHF3NN

AWESAFE 9" GPS Navigator Instruction Manual

Model: B0GHVHF3NN

INTRODUCTION

The AWESAFE 9-inch GPS Navigator is a versatile navigation system designed for cars, trucks, and RVs. It features a large, clear display and provides reliable, turn-by-turn voice guidance to help you reach your destination efficiently and safely. This manual provides detailed instructions for setting up, operating, and maintaining your device.

WHAT'S IN THE BOX

Upon unboxing your AWESAFE GPS Navigator, ensure all the following components are present:

- GPS Navigation Unit
- Car Charger
- USB Cable
- Suction Cup Mount
- User Manual

SETUP

1. Mounting the Device

The AWESAFE GPS Navigator comes with a suction cup mount for secure placement in your vehicle. For optimal visibility and safety, mount the device on your windshield or dashboard where it does not obstruct your view of the road.

1. Attach the suction cup mount to the back of the GPS unit by aligning the tabs and sliding it into place until it clicks securely.
2. Clean the desired mounting surface (windshield or dashboard) to ensure a strong suction.
3. Press the suction cup firmly against the surface and push down the lever to create a vacuum seal.
4. Adjust the angle of the GPS unit for comfortable viewing.

Bracket installation

Image: Step-by-step visual guide for attaching the suction cup mount to the GPS unit and adjusting its position. This demonstrates the physical installation process.

2. Initial Power-On and Charging

Before first use, it is recommended to fully charge the device. Connect the car charger to your vehicle's cigarette lighter socket and the USB cable to the GPS unit's charging port.

- Connect the USB cable to the GPS unit and the car charger.
- Plug the car charger into your vehicle's 12V power outlet.
- The device will automatically power on or can be turned on by pressing the power button.

3. Map Updates

The AWESAFE GPS Navigator comes with preloaded North America maps (USA, Canada, Mexico) and offers lifetime free map updates. To ensure you always have the latest routes and points of interest, regularly update your maps. Map updates can typically be performed by connecting the device to a computer and using the provided software or by

downloading updates via a TF card. Refer to the specific instructions provided with your device for detailed update procedures.

Image: A graphic illustrating two methods for updating the GPS maps: connecting to a Windows PC or downloading via a TF card. This highlights the ease of keeping maps current.

OPERATING INSTRUCTIONS

1. Basic Navigation

To begin navigating, tap the "Navigation" icon on the main menu. You can search for destinations using various methods:

- **Postcode/Address:** Enter the full address or postcode of your destination.
- **Coordinates:** Input specific GPS coordinates.
- **Favorite:** Select from your saved favorite locations.
- **POI (Points of Interest):** Search for nearby restaurants, gas stations, hotels, and other points of interest.

After entering your destination, the device will calculate the route. You can choose from four route options: Fast, Green, Short, or Convenient.

2. Smart Voice Guidance & Real-Time Alerts

The GPS provides clear, turn-by-turn voice prompts, allowing you to keep your eyes on the road. It also offers real-time alerts for enhanced safety:

- **Speed Camera Alerts:** Notifies you of upcoming speed cameras.
- **Red Light Warnings:** Alerts you to traffic lights.
- **Speed Limit Changes:** Informs you of changes in speed limits.
- **Active Lane Assistant:** Guides you to the correct lane for upcoming turns or exits.

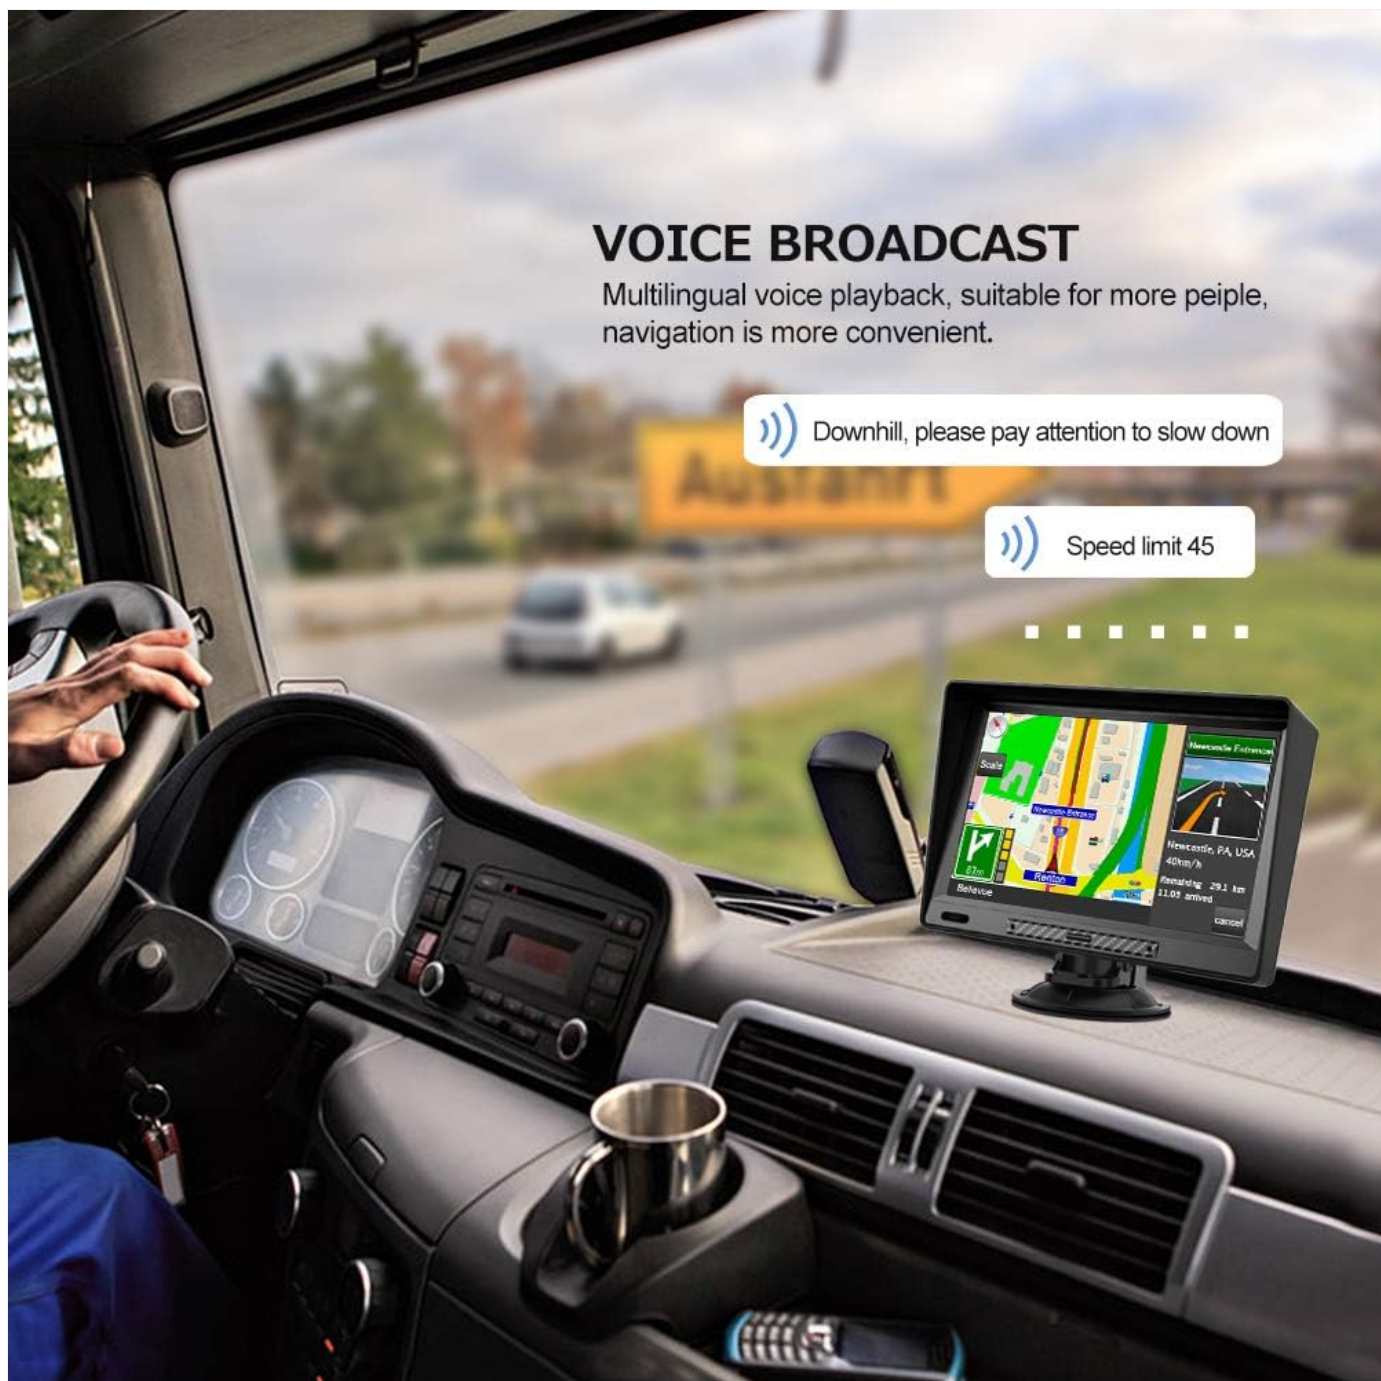

Image: The GPS screen showing voice broadcast messages, such as "Downhill, please pay attention to slow down" and "Speed limit 45". This illustrates the voice guidance feature.

3. Customized Route for Trucks and RVs

For truck and RV drivers, the device allows you to customize routes based on your vehicle's specific dimensions and weight. This feature helps avoid roads with width, height, or weight restrictions, ensuring a safer and more efficient journey.

- Access the settings menu to input your vehicle's length, width, height, and weight.
- The navigation system will then calculate routes that are suitable for your vehicle type.

Image: A collage of images depicting traffic lights, a truck height limit sign (1.9m), and a road information camera. This visually represents the device's ability to customize routes and provide alerts for various road conditions and vehicle restrictions.

4. FM Broadcast Function

The device supports FM broadcast, which allows you to transfer the GPS sound (voice guidance) to your car's audio system. This is not an FM radio function but a way to output audio through your car speakers.

1. Go to the main menu and select "FM" or "Settings" to find the FM broadcast option.
2. Enable the FM broadcast and select an unused FM frequency.
3. Tune your car's FM radio to the same frequency.
4. GPS voice guidance will now play through your car speakers.

Bluetooth handsfree

Make you safer and more comfortable on the road

Get precise coordinates of the vehicle position

The GPS signal is powerful and can easily search address or place on the map.

Image: The GPS navigator screen showing a map with navigation information, including distance and estimated arrival time. The image also highlights the device's sun visor design, which helps reduce glare for better screen visibility.

5. Bluetooth Connectivity

The AWESAFE GPS Navigator features Bluetooth connectivity, enabling hands-free calling for a safer driving experience.

- Pair your mobile phone with the GPS device via Bluetooth in the settings menu.
- Once paired, you can answer calls directly through the GPS unit.

SUN VISOR DESIGN

You can avoid direct sunlight around the screen, there is no need to worry about the effects of sunlight on the screen display.

MAINTENANCE

- **Cleaning:** Use a soft, lint-free cloth to clean the screen and exterior of the device. Avoid abrasive cleaners or solvents.
- **Storage:** When not in use, store the GPS navigator in a cool, dry place away from direct sunlight and extreme temperatures.
- **Software & Map Updates:** Regularly check for and install software and map updates to ensure optimal performance and the most current navigation data. Connect your device to a computer and follow the instructions provided by the manufacturer's software.

TROUBLESHOOTING

Issue	Possible Solution
Device does not power on.	Ensure the device is fully charged or connected to a power source. Check the car charger and USB cable for damage.
No GPS signal.	Ensure the device has a clear view of the sky. Move away from tall buildings or dense foliage. Allow a few minutes for the device to acquire satellites.
Screen is unresponsive.	Perform a soft reset by pressing and holding the power button for 10-15 seconds. If the issue persists, ensure the screen is clean and free of debris.
Voice guidance is too low or not audible.	Adjust the volume settings on the device. If using FM broadcast, ensure your car radio is tuned to the correct frequency and its volume is adequate.

SPECIFICATIONS

- **Item Weight:** 2.61 pounds
- **Package Dimensions:** 10.28 x 7.17 x 4.21 inches
- **Display Size:** 9 Inches
- **Screen Size:** 9 Inches
- **Display Type:** LCD, LED
