

Wooask Wooask-A9

Wooask A9 AI Translator Earbuds Instruction Manual

Model: Wooask-A9

Brand: Wooask

INTRODUCTION

The Wooask A9 AI Translator Earbuds are designed to provide seamless global communication and connectivity. This device integrates instant translation, 4G calling, mobile hotspot capabilities, and an AI assistant into a single, portable unit. It supports both online and offline translation across numerous languages, making it an essential tool for international travel, business, and daily interactions.

SETUP

Initial Power On

1. Press and hold the power button on the side of the A9 device until the screen illuminates.
2. Follow the on-screen prompts to select your preferred system language and initial settings.

Earbud Pairing

1. Ensure the earbuds are placed inside the charging case.
2. Open the charging case. The earbuds will automatically connect to the A9 device. A confirmation message will appear on the screen.
3. For first-time use, navigate to the 'Translator Earbuds' application on the A9 screen and confirm pairing.

Offline Translation

Offline mode supports the 16 most widely spoken languages worldwide, allowing you to translate without the need for an internet connection.

SIM Card Insertion (Optional for 4G/Hotspot/Calls)

1. Locate the SIM card slot on the side of the A9 device.
2. Use the provided SIM card ejector tool to open the SIM tray.
3. Place a local Nano-SIM card into the tray, ensuring correct orientation.
4. Gently push the tray back into the device until it clicks into place.
5. The device will detect the SIM card and enable 4G connectivity, calling, and hotspot features.

Family Gatherings: No More Lost in Translation Moments

Imagine your grandmother's stories finally understood by your American spouse. See tears of joy when language barriers vanish at birthday parties and weddings. These translator earbuds create moments where everyone belongs - where "I love you" sounds perfect in any language. Share recipes, traditions and laughter like never before, because family connections deserve perfect understanding.

OPERATING MODES

1. Voice Translation Mode

For direct, real-time spoken translation using the device's built-in microphone and speaker.

- Select 'Voice Translation' from the main menu.
- Choose your native language (e.g., English) and the target language (e.g., Spanish).
- Press and hold the corresponding language button (A or B) on the side of the device while speaking. Release the button to hear the translation.

Insert SIM - Unlock More!

Insert a local SIM card for cheap data, and instantly transform your translator into a phone and a portable WiFi hotspot for your entire group and your phone, laptop, and tablet simultaneously. No more carrying multiple devices. No more expensive roaming fees. Just smart, connected travel.

2. Translator Earbuds Mode

Enables discreet, two-way communication through the included earbuds, ideal for private conversations or noisy environments.

- Select 'Translator Earbuds' from the main menu.
- Ensure earbuds are paired and worn by both participants.
- Speak naturally. The device will translate and deliver audio to each person's earbud in their native language.

16 Offline Languages

In-Flight Communication

Nature Excursions and Camping

Rural and Remote Visits

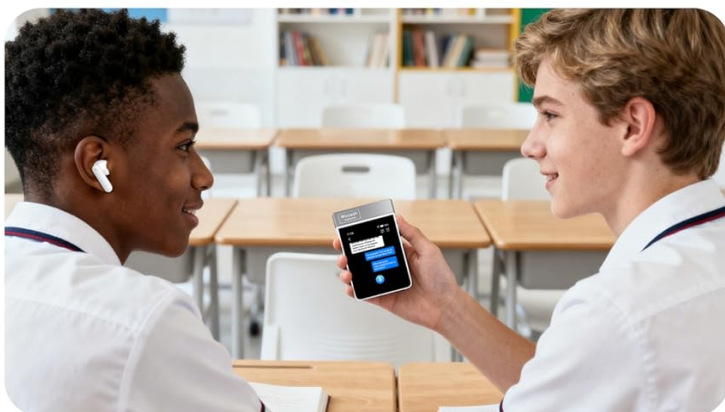

Maritime Adventures

Image: Two people engaged in a conversation, each wearing a Wooask A9 earbud for private, real-time translation.

3. Offline Translation Mode

Translate without an internet connection. Supports 16 widely spoken languages.

- Select 'Offline Translation' from the main menu.
- Choose from the available offline language pairs.
- Proceed with voice translation as described above.

Study Abroad: Learn Without Language Limits

See yourself confidently participating in French literature classes or making local friends in Tokyo. These earbuds become your study buddy - translating lectures, helping with homework, and even scanning foreign textbooks. Embrace the full study abroad experience without language anxiety, opening doors to academic success and lifelong international friendships.

5. 4G Calling & Hotspot (with SIM card)

With a SIM card inserted, the A9 can function as a standalone phone and a mobile hotspot.

- **Making Calls:** Select 'Telephone' from the main menu, dial the number, and make calls directly from the device.
- **Sharing Hotspot:** Go to 'Settings' > 'Hotspot and network sharing' to activate the 4G mobile hotspot.

Outdoor Adventures: Never Get Stuck Offline. Translate & Call Anywhere

Wooask A9 keeps you connected even off the grid. With standalone translation that works anywhere and a massive battery that lasts for days, it's your go-to emergency tool and entertainment companion. Hike, travel, and explore with confidence—translate freely, share hotspots, and enjoy music on the go. Adventure just got smarter.

MAINTENANCE

Cleaning

- Wipe the device and earbuds with a soft, dry, lint-free cloth.
- Do not use abrasive cleaners, alcohol, or chemical solvents.

Battery Care

- Charge the device regularly, even if not in use, to maintain battery health.

- Avoid extreme temperatures, which can degrade battery performance.

TROUBLESHOOTING

Device Not Powering On

- Ensure the device is fully charged. Connect it to a power source using the provided USB-C cable.
- Press and hold the power button for at least 10 seconds to attempt a forced restart.

Translation Inaccuracy

- Speak clearly and at a moderate pace. Avoid speaking too quickly or with heavy accents.
- Ensure you have selected the correct source and target languages.
- For online translation, check your Wi-Fi or 4G connection strength.
- Ensure the microphone is not obstructed.

Earbuds Not Connecting

- Place both earbuds back into the charging case and close it for a few seconds, then reopen.
- Check the Bluetooth settings on the A9 device to ensure Bluetooth is enabled and the earbuds are listed as a paired device.
- Ensure earbuds are charged.
